

# Addendum by the Conservative Group

## Transport and Environment Committee

6 December 2018

### Item 7.1 – Transport Asset Management Plan (TAMP)

#### Committee

Adds:

- 1.2 Notes public concern is increasing about the condition of our road network and that inadequate maintenance only stores up even greater problems for the future;
- 1.3 Expresses concern that over a number of years a large percentage of investment in roads has not been delivered due to a combination of lack of internal resources and conflicts with other priorities and that the Council is projected to fail to carry out almost two thirds of funded repairs this financial year - jeopardising the administration's commitment to invest £100m in the roads and pavements over the next five years.
- 1.4 Agrees to a dedicated report within one cycle detailing actions being taken and to be taken to address the gap between available funding and volume of works carried out.
