Cabinet

Agenda

6pm
Wednesday, 21 October 2026
Council Chamber
Wyre Forest House
Finepoint Way
Kidderminster

Cabinet

The Cabinet Members and their responsibilities:-

Councillor M Hart	Leader of the Council & Strategy
Councillor D Ross	Deputy Leader & Finance & Capital Portfolio
Councillor C Rogers	Housing, Health and Well-being
Councillor D Morehead	Economic Regeneration, Planning & the Green Agenda
Councillor T Onslow	Culture, Leisure, Arts & Community Safety
Councillor N Desmond	Operational Services

Scrutiny of Decisions of the Cabinet

The Council has one Scrutiny Committee that has power to investigate policy issues and question members of the Cabinet who have special responsibility for a particular area of the Council's activities. The Cabinet also considers recommendations from this Committee.

In accordance with Section 10 of the Council's Constitution, Overview and Scrutiny Procedure Rules, and Standing Order 2.4 of Section 7, any item on this agenda may be scrutinised by the Scrutiny Committee if it is "called in" by the Chairman or Vice-Chairman of the Overview & Scrutiny Committee and any other three non-Cabinet members.

The deadline for "calling in" Cabinet decisions is 5pm on Monday 2 November 2026.

Councillors wishing to "call in" a decision on this agenda should contact Louisa Bright, Principal Committee and Member Services Officer, Wyre Forest House, Finepoint Way, Kidderminster. Telephone: 01562 732763 or email louisa.bright@wyreforestdc.gov.uk

Urgent Key Decisions

If the Cabinet needs to take an urgent key decision, the consent of the Scrutiny Committee Chairman must be obtained. If the Scrutiny Committee Chairman is unable to act the Chairman of the Council or in his/her absence the Vice-Chairman of the Council, must give consent. Such decisions will not be the subject to the call in procedure.

Disclosure of Interests

Members and co-opted Members of the Council are reminded that, in accordance with the Council's Code of Conduct and the statutory provisions of the Localism Act, they are required to consider in ADVANCE of each meeting whether they have a disclosable pecuniary interest (DPI), an other registrable interest (ORI) or a non-registrable interest (NRI) in relation to any matter on the agenda. If advice is needed, Members should contact the Monitoring Officer or other legal officer in good time before the meeting.

If any Member or co-opted Member of the Council identifies a DPI or ORI which they have not already registered on the Council's register of interests or which requires updating, they should complete the disclosure form which can be obtained from Democratic Services at any time, copies of which will be available at the meeting for return to the Monitoring Officer.

Members and co-opted Members are required to disclose any DPIs and ORIs at the meeting.

Where the matter relates to a DPI they may not participate in any discussion or vote on the matter and must not stay in the meeting unless granted a dispensation.

Where the matter relates to an ORI they may not vote on the matter unless granted an advance dispensation.

Where a Member or co-opted Member has an NRI which directly relates to their financial interest or wellbeing, or that of a relative or close associate, they must disclose the interest at

the meeting, may not take part in any discussion or vote on the matter and must not stay in the meeting unless granted a dispensation.

Where a matter affects the NRI of a Member or co-opted Member, the Code of Conduct sets out the test which must be applied by the MEMBER to decide whether disclosure is required. Again please ensure you have spoken in ADVANCE to the relevant legal officer and determined whether it is appropriate to declare the NRI and leave.

For further information

If you have any queries about this Agenda or require any details of background papers, further documents or information you should contact Louisa Bright, Principal Committee and Member Services Officer, Wyre Forest House, Finepoint Way, Kidderminster, DY11 7WF. Telephone: 01562 732763 or email louisa.bright@wyreforestdc.gov.uk

Documents referred to in this agenda may be viewed on the Council's website - www.wyreforestdc.gov.uk/council/meetings/main.htm

WEBCASTING NOTICE

This meeting is being filmed* for live or subsequent broadcast via the Council's website site (www.wyreforestdc.gov.uk).

At the start of the meeting the Chairman will confirm if all or part of the meeting is being filmed.

You should be aware that the Council is a Data Controller under the Data Protection Act 1998. The footage recorded will be available to view on the Council's website for 6 months and shall be retained in accordance with the Council's published policy.

By entering the meeting room and using the public seating area, you are consenting to be filmed and to the possible use of those images and sound recordings for webcasting and or training purposes.

If members of the public do not wish to have their image captured they should sit in the Stourport and Bewdley Room where they can still view the meeting.

If any attendee is under the age of 18 the written consent of his or her parent or guardian is required before access to the meeting room is permitted. Persons under 18 are welcome to view the meeting from the Stourport and Bewdley Room.

If you have any queries regarding this, please speak with the Council's Legal Officer at the meeting.

* Unless there are no reports in the open session.

Wyre Forest District Council

Cabinet

Wednesday, 21 October 2026

Council Chamber, Wyre Forest House, Finepoint Way, Kidderminster

Part 1

Open to the press and public

Agenda item	Subject	Page Number
1.	Apologies for Absence	
2.	Declarations of Interests by Members In accordance with the Code of Conduct, to invite Members to declare the existence and nature of any disclosable pecuniary interest (DPI), an other registrable interest (ORI) or a non-registrable interest (NRI) in relation to any matter on the agenda. Please see the Members' Code of Conduct as set out in Section 14 of the Council's Constitution for full details.	
3.	Minutes To confirm as a correct record the Minutes of the meeting held on the 16 September 2026.	6
4.	CALL INS a verbal update will be given on any decisions which have been "called in" since the last meeting of the Cabinet.	
5.	Items Requiring Urgent Attention To consider any item which, in the opinion of the Chairman requires consideration at the meeting as a matter of urgency.	
6.	Public Participation In accordance with the Council's Scheme for Public Speaking at Meetings of Cabinet, to allow members of the public to present petitions, ask questions, or make statements, details of which have been received by 12 noon on Monday 12 October. (See front cover for contact details). Four members of the public have registered to speak in respect of agenda item 7.1 - Disposal of part of Burlish Country Park	

7.		
7.1	Councillor D Ross Disposal of part of Burlish Country Park To consider a report from the Director of Commercial Services to enable Cabinet to determine whether or not the disposal should proceed. <i>The appendices to this report have been circulated electronically.</i> Also to consider recommendations from the Overview & Scrutiny Committee from its meeting on 15 October 2026.	12 To follow

8.	To consider any other business, details of which have been communicated to the Director of Legal & Governance before the commencement of the meeting, which the Chairman by reason of special circumstances considers to be of so urgent a nature that it cannot wait until the next meeting.	
9.	Exclusion of the Press and Public To consider passing the following resolution: “That under Section 100A(4) of the Local Government Act 1972 the press and public be excluded from the meeting during the consideration of the following item of business on the grounds that it involves the likely disclosure of “exempt information” as defined in paragraph 3 of Part 1 of Schedule 12A to the Act”.	

Part 2

Not open to the Press and Public

10.	To consider any other business, details of which have been communicated to the Director of Legal & Governance before the commencement of the meeting, which the Chairman by reason of special circumstances considers to be of so urgent a nature that it cannot wait until the next meeting.	

WYRE FOREST DISTRICT COUNCIL

CABINET

COUNCIL CHAMBER, WYRE FOREST HOUSE, FINEPOINT WAY, KIDDERMINSTER

16 SEPTEMBER 2026 (6PM)

Present:

Councillors: M J Hart (Chairman), D Ross (Vice-Chairman), N J Desmond, D Morehead, T L Onslow and C Rogers.

Observers:

Councillors: G Connolly and F M Oborski MBE.

CAB.21 Apologies for Absence

There were no apologies for absence.

CAB.22 Declarations of Interests by Members

No declarations of interest were made.

CAB.23 Minutes

Decision: The minutes of the Cabinet meeting held on the 9 July 2026 and the minutes of the meeting of the Sub-Committee held on 12 August 2026 be confirmed as a correct record and signed by the Chairman.

CAB.24 Call Ins

No decisions had been called in since the last Cabinet meeting.

CAB.25 Items Requiring Urgent Attention

There were no items requiring urgent attention.

CAB.26 Public Participation

There was no public participation.

CAB.27 Review of Public Space Protection Orders and Level of Fines for breaching a Public Space Protection Order or Community Protection Notice

A report was considered from the Deputy Chief Executive: Regeneration and Commercial that outlined the results from the consultation process regarding the dog control Public Space Protection Order (PSPO) and the restriction of alcohol consumption in Bewdley, Kidderminster and Stourport-on-Severn PSPOs. The report also set out the implementation process if the PSPOs are agreed to be extended for a further three-year period from 1 October 2026.

The Cabinet Member for Culture, Leisure, Arts and Community Safety presented the report and formally moved the recommendations for approval.

The Cabinet Member gave a summary of the background and key issues set out in the report.

She explained that to meet the legislative requirements of the Anti-social Behaviour, Crime and Policing Act 2014 the authority must publish the order as made, extended or varied on its website. She added that, once agreed, the intention was to publicise the orders through the use of signage in key locations. She further explained that the publicity was intended to ensure that residents and visitors were aware of each of the PSPOs and the associated restrictions and conditions.

The Leader seconded the proposals.

Councillor G Connolly joined the meeting at 6.11pm.

The Vice-Chairman of the Overview and Scrutiny Committee, Councillor F Oborski MBE presented the recommendations from its meeting on 3 September 2026.

Decision: In line with the recommendations from the Overview and Scrutiny Committee from its meeting on 3 September 2026:

The Cabinet DECIDED that:

- 1.1 A Public Space Protection Order regarding dog controls, within the specified area, outlined in Appendix Five of the report, is extended for a further three-year period.**
- 1.2 A Public Space Protection Order to restrict the consumption of alcohol within the specified area of Bewdley, outlined in Appendix Five, is extended for a further three-year period.**
- 1.3 A Public Space Protection Order to restrict the consumption of alcohol within the specified area of Kidderminster, outlined in Appendix Five, is extended for a further three-year period.**
- 1.4 A Public Space Protection Order to restrict the consumption of alcohol within the specified area of Stourport-on-Severn, outlined in Appendix Five, is extended for a further three-year period.**
- 1.5 With effect from the date on which section 4 of the Crime and Policing Act 2026 comes into force, the maximum Fixed Penalty Notice (FPN) that may be issued for a breach of a Public Spaces Protection Order or breach of a Community Protection Notice shall increase from £100 to £500.**

CAB.28 Bewdley Conservation Area Character Appraisal

A report was considered from the Director of Housing and Planning that

presented the Draft Bewdley Conservation Area Character (CACA) Appraisal with proposed boundary change. The report also sought agreement that it be consulted upon.

The Cabinet Member for Economic Regeneration, Planning and the Green Agenda presented the report and formally moved the recommendations for approval. He thanked the Planning Team for their continued work on this matter.

The Cabinet Member gave a summary of the background and key issues detailed in the report. He explained that the updated Bewdley CACA has been prepared through a detailed review of the existing appraisal, combined with site surveys and an assessment of changes that had occurred within the Conservation Area since the previous document was produced.

The Leader seconded the proposals.

Decision: The Cabinet:

1.1 AGREED for a further period of consultation regarding the proposed boundary change between the 21 September and 18 October 2026.

1.2 NOTED current responses and approve all current proposed changes agreed from the initial Bewdley Conservation Area Character Appraisal consultation.

CAB.29 Budget and Performance Monitoring First Quarter 2026-27

A report was considered from the Director of Resources that briefed members on the Council's financial and other performance at the end of Quarter 1 ending 30 June 2026. The report also presented the emerging budget pressures and known variances that are likely to have an impact on the outturn position for the 2026-27 financial year.

The Cabinet Member for Finance and Capital Portfolio presented the report and formally moved the recommendations for approval.

The Cabinet Member gave a detailed summary of the background and key issues set out in the report. He thanked the Director of Resources and her team for providing the technical and comprehensive report.

The Cabinet Member was pleased to report that the forecast full year services variance at the end of the quarter was £341k better than the projection in the medium-term financial strategy (MTFS). He added that with the inclusion of the capital account the year end outturn position was forecast to be a positive variance of £864k.

In response to a point raised at the Overview and Scrutiny Committee meeting on 3 September regarding paragraph 8.1 of the report. The Cabinet Member advised that the Council was meeting the costs of the bridging finance pending receipt of the former LEP £2.45m grant funding currently held by Birmingham

City Council. He confirmed that the costs for this was approximately £8,000 per month.

The Leader seconded the recommendations.

The Vice-Chairman of the Overview and Scrutiny Committee presented the recommendations from its meeting on 3 September 2026.

Decision: In line with the recommendations from the Overview and Scrutiny Committee from its meeting on 3 September 2026:

The Cabinet NOTED:

- 1.1 The projected budget variations, virements and comments within the report and Appendices 1 to 3.**
- 1.2 The performance against measures and actions as set out in the report and Appendix 4.**
- 1.3 The recommendations from the Overview and Scrutiny Committee from its meeting on 3rd September 2026.**

CAB.30 Contract for the Supply of Electricity

A report was considered from the Director of Commercial Services that sought approval to use the West Mercia Energy framework to enter a contract for the supply of electricity as required by the Contract Procedure Rules for services over the value of £170,000.

The Cabinet Member for Finance and Capital Portfolio presented the report and formally moved the recommendations for approval.

The Cabinet Member explained that the Council's current arrangements were due to expire on 31 March 2027.

The Leader thanked the Director of Commercial Services for the report and formally seconded the proposals.

Decision: The Cabinet:

- 1.1 APPROVED entering into a direct award contract with West Mercia Energy for the provision of electricity using the Flexible Electricity Framework for a period of 3 years with the option to extend for a further 2 years.**
- 1.2 DELEGATED authority to the Director of Commercial Services, in consultation with Director of Legal and Governance, Director of Resources, and Deputy Leader and Cabinet Member for Finance and Capital Portfolio to award the electricity supply contract.**

CAB.31 Consultation on potential changes to council tax reduction scheme for 2027-28 onwards

A report was considered from the Director of Revenues, Benefits and Customer Services to consider whether to consult on potential changes to the Council Tax Reduction Scheme for 2027-28 onwards.

The Cabinet Member for Finance and Capital Portfolio presented the report and formally moved the recommendations for approval.

The Cabinet Member gave a brief summary of the background and key issues set out in the report. He explained that, if the public consultation was approved, the outcomes would be reported back to Cabinet and Council prior to any final decision taken on the 2027-28 scheme.

The Leader seconded the recommendation.

The Vice-Chairman of the Overview and Scrutiny Committee presented the recommendations from its meeting on 3 September 2026.

Decision: In line with the recommendations from the Overview and Scrutiny Committee from its meeting on 3 September 2026:

The Cabinet APPROVED the commencement of a public consultation on increasing the maximum level of discount for working age Council Tax Reduction Scheme claimants from 90% to 100% from 1 April 2027.

CAB.32 Disposal of land at Clensmore Street, Kidderminster

A report was considered from the Director of Housing and Planning that recommended the disposal of land at Clensmore Street, Kidderminster to a Registered Provider (RP) for the provision of affordable housing.

The Cabinet Member for Finance and Capital Portfolio presented the report and formally moved the recommendations for approval.

The Cabinet Member outlined the background and key issues as detailed in the report. He explained that a consultation exercise to dispose of the open space was conducted and concluded in December 2023. He added that, as there were no responses to the consultation and as nothing had altered since that time, it was considered that the disposal notification was still valid, and it was not proposed to repeat the section 123 notice again.

The Leader seconded the proposals.

Decision: The Cabinet AGREED:

- 1.1 to dispose of the freehold of the land owned by Wyre Forest District Council located at Clensmore Street, Kidderminster to Citizen Housing on the terms set out in the report.**
- 1.2 to delegate authority to the Director of Housing and Planning to conclude the disposal in consultation with the Director of Legal**

Agenda Item No. 3

and Governance, the Director of Resources and s151 Officer and the Deputy Leader and Cabinet Member for Finance and the Capital Portfolio.

There being no further business the meeting closed at 6.57pm.

WYRE FOREST DISTRICT COUNCIL

CABINET
21st OCTOBER 2026

DISPOSAL OF PART OF BURLISH COUNTRY PARK

OPEN	
REPORT AUTHOR:	Faye Parrett, Director of Commercial Services
CONTACT OFFICER:	Faye Parrett, Director of Commercial Services
CABINET MEMBER:	Councillor David Ross, Deputy Leader and Cabinet Member for Finance and the Capital Portfolio
APPENDICES:	Appendix 1: Plan of Burlish Country Park showing the part proposed for disposal Appendix 2: Summary of responses to open space disposal notice and proposed response to objections Appendix 3: Equality Impact Assessment Appendix 4: Kidderminster Harriers Petition Summary Appendix 5: Friends of Burlish Meadows petition Appendix 6: KHFC vision document, Summer 2026

1.0 PURPOSE OF REPORT

- 1.1 Following an approach from Kidderminster Harriers Football Club (KHFC) regarding the potential purchase of part of Burlish Country Park, the Council's Cabinet considered a report on 9 July 2026 concerning the proposed disposal of approximately 8.5 hectares of land to KHFC.

Cabinet agreed the principle of the disposal, subject to a number of conditions being satisfied before any sale could proceed. These conditions included:

- Compliance with section 123 of the Local Government Act 1972;
- Completion of the statutory process for the disposal of open space land;
- Consideration of any objections received as part of that process; and
- The grant of the necessary planning permission..

- 1.2 In order to commence these statutory and regulatory processes, Cabinet was required to make an in-principle decision as to whether it was prepared to dispose of the land. The decision taken on 9 July 2026 did not authorise the sale of the land, but enabled the Council to proceed with the necessary consultation, statutory notices, consideration of objections and other due diligence requirements before any final decision could be taken
- 1.3 Following Cabinet's decision, the Council commenced the statutory process required under section 123(2A) of the Local Government Act 1972 and undertook further work

in relation to valuation, legal due diligence, consultation and assessment of the implications of the proposed disposal.

- 1.4 The purpose of this report is to provide Cabinet with the outcome of that work and to enable Cabinet to determine whether or not the disposal should proceed.
- 1.5 Cabinet is not being asked to determine any planning matters. Any future planning application would be considered separately by the Local Planning Authority through the statutory planning process. The purpose of this report is solely to enable Cabinet to determine whether, having considered all relevant information, it remains appropriate for the Council to dispose of the land identified in Appendix 1.
- 1.6 Because of the Asset of Community Value process which has commenced, the Cabinet cannot decide to dispose of the land to a specific organisation or individual as it will have to consider any community-led bid that is received alongside other proposals. However, it can decide not to proceed with the disposal.

2.0 RECOMMENDATIONS

2.1 The Cabinet is ASKED to:

- 2.1.1 Note the responses received following publication of the statutory notice under section 123(2A) of the Local Government Act 1972, summarised in Appendix 2; AND**
- 2.1.2 Consider the objections and representations received and the proposed response to those objections also set out in Appendix 2; AND**
- 2.1.3 Agree that, having considered the objections and representations received, the Council will not proceed with the disposal of part of Burlish Country Park and that the whole of Burlish Country Park will be retained in WFDC's ownership.**

3.0 BACKGROUND

- 3.1 Cabinet considered a report on 9 July 2026 regarding the proposed disposal of part of Burlish Country Park. Following Cabinet's July 2026 decision, the Council undertook the statutory process required by section 123(2A) of the Local Government Act 1972, in relation to disposal of public open space.
- 3.2 Officers have completed further legal, valuation, financial and policy due diligence relating to the proposed disposal. This has included consideration of responses received through the statutory open space disposal process, review of biodiversity and environmental information, consideration of the Council's statutory biodiversity duty, analysis of the evidence of need for additional sports facilities and a review of the independent valuation advice regarding the proposed consideration. The purpose of this further work has been to ensure that Cabinet is in possession of sufficient

information to determine whether the disposal should proceed and whether the requirements of section 123 of the Local Government Act 1972 have been satisfied.

4.0 KEY ISSUES

Strategic Considerations Relating to Disposal and Retention

- 4.1 The Council is not under any statutory obligation to dispose of the land. The decision is therefore one of public policy, asset management and strategic judgement, taking account of the Council's wider objectives, statutory duties and responsibilities. Whilst planning considerations provide relevant context, Cabinet is not being asked to determine whether planning permission should be granted. The proposal is capable of contributing towards the Council's Corporate Plan priorities. In relation to Economic Growth and Regeneration, it could facilitate significant private sector investment and support the continued development of local sporting infrastructure. In relation to Community Wellbeing, it could increase opportunities for participation in organised sport and physical activity. The proposal contributes less directly towards environmental priorities because part of a publicly accessible green space would be lost. Cabinet must therefore determine whether the potential economic and community benefits outweigh the potential environmental impacts identified elsewhere in this report.
- 4.2 The decision in principle in July 2026 responded to a specific proposal that had been submitted by Kidderminster Harriers Football Club (KHFC) which the Council was obliged to consider. This report seeks the Cabinet's decision as to whether to dispose of the land and the justification for that, having considered and weighed all the relevant issues including the responses to the public notice. The decision rests on how the Cabinet balances the arguments for and against a disposal for that purpose. The Asset of Community Value process has been triggered, and the Council cannot proceed with a sale to KHFC or any other organisation until the deadline for community bids has passed. However the Cabinet can decide not to proceed with the disposal.
- 4.3 KHFC currently operates an established training facility immediately adjoining the land under consideration. The Club has identified a requirement for additional land to support the potential expansion of its sporting infrastructure, including training facilities, football pitches, and associated community, educational and sporting uses. Making the land available to the Club could facilitate external investment that the Council would be unlikely to deliver from its own resources, while also reducing future development and operational responsibilities. The Council's rationale for exploring this option includes the potential to secure a capital receipt, support improvements to community sporting infrastructure, and contribute to corporate priorities relating to community wellbeing and economic growth. These objectives are capable of constituting legitimate public interest considerations. Conversely, retaining the land would preserve its contribution to publicly accessible open space, biodiversity enhancement and nature recovery objectives. As such, the decision requires a balanced assessment of the respective benefits associated with both retention and alternative future uses.
- 4.4 In determining whether disposal is appropriate, Members may also have regard to the wider strategic benefits of the proposal. These include addressing identified

deficiencies in football provision, supporting the retention and expansion of sporting activity within the district, and increasing opportunities for participation in organised sport, with associated health and wellbeing benefits. Further evidence of need and anticipated community benefits is set out later in this report.

- 4.5 The proposal and investment from KHFC would support investment in local sporting facilities, helping to meet existing demand and reducing the need for teams and families to travel outside Wyre Forest to access training and playing opportunities. This has the potential to reduce travel distances, associated transport costs and carbon emissions, while retaining sporting expenditure and related economic activity within the district rather than that activity being displaced to neighbouring authorities. Collectively, these outcomes would support the Council's wider objectives for health, wellbeing and sustainable community development. Whilst these benefits are recognised, they are outweighed by the potential biodiversity, open space and community benefits of retention.

Outcome of Section 123 Statutory Consultation

- 4.6 Section 123 of the Local Government Act 1972 stipulates that:
“(2A) A principal council may not dispose under subsection (1) above of any land consisting or forming part of an open space unless before disposing of the land they cause notice of their intention to do so, specifying the land in question, to be advertised in two consecutive weeks in a newspaper circulating in the area in which the land is situated, and consider any objections to the proposed disposal which may be made to them.”

In practice section 123(2A) of the Local Government Act 1972 requires local authorities intending to dispose of open space land to advertise their intention to do so in a newspaper circulating in the area for two consecutive weeks and to consider any objections received before making a final decision. It is important to note that the legislation requires the authority to invite and consider objections; it does not impose a broader statutory duty to undertake a full public consultation or to seek expressions of support for the proposal.

- 4.7 The Council published the required notices in the *Kidderminster Standard* on Friday 17th and Friday 24th July. In addition, the notices were published on WFDC website and on WFDC social media pages, with hard copies placed on site. Hard copies of the public notice were also available for collection from Wyre Forest House and The Hub, Green Street. Four weeks were allowed for responses, until Friday 14th August.
- 4.8 A total of 656 responses were received. Of the responses, 650 (99%) were objections; there were three responses in support and three that represented enquiries. (A further 7 objections were received after the deadline of 14th August and are not counted in the analysis below.) In addition, two petitions were received, details of which are set out in paragraphs 4.21 to 4.22 below. The petition in opposition was signed by three times more people than the petition in support and does not raise any objections that are not already covered by the summary in Appendix 2. Within the 650 objections received before the deadline, fifteen themes were identified. These themes, together with the number of responses in which they were raised, are set out below.

Objections	Theme Count (approx)
Ecological / biodiversity concern	605
Community wellbeing	448
Loss of open / green space	305
Previous investment and work	210
Alternative site / location options	182
Accessibility	162
Traffic / parking concern	116
Light Pollution	103
Conflict with national / local planning policy	98
Noise Pollution	71
Requests for evidence	54
Flood risk and drainage impact	45
Air Pollution	35
Uncertainty over intended development	29
Under-utilisation of current pitches	28

One of the responses received that was in support of the disposal, was Kidderminster Harriers Independent Supporters Trust (KHIST), who represented 350 Kidderminster Harriers supporters.

- 4.9 All objections, comments and representations received have been carefully reviewed. The issues raised principally relate to biodiversity, loss of open space, informal recreation, landscape impact and the future of Burlish Country Park. These objections raise legitimate considerations which Cabinet should consider. The case law and legislation collectively indicate that Cabinet is not required to resolve or satisfy every objection received under section 123(2A). Rather, it must demonstrate that objections have been conscientiously considered, that all material issues have been identified and weighed, and that any decision to proceed reflects a rational balancing of the identified harms and benefits. A summary of comments is attached at Appendix 2, together with suggested Cabinet responses, which the Cabinet is being invited to approve.
- 4.10 The strength of feeling expressed through the consultation process is recognised. Concerns relating to biodiversity, open space, informal recreation and the future of Burlish Country Park are sincerely held. Those concerns have been carefully considered and are reflected throughout this report. Having completed the statutory consultation process, the Cabinet now has sufficient information before it to determine whether the identified benefits of the proposal outweigh the adverse impacts and objections raised.
- 4.11 If the Cabinet approves the suggested responses in Appendix 2, it considers that many of the issues are not relevant to the question of disposal of land and instead fall to be considered by the planning process. However, Cabinet must also consider the wider strategic, environmental, biodiversity and community implications of retaining or disposing of the land. Objections received as part of the section 123 process are not determinative of the outcome, nor is the process intended to operate as a referendum. Having considered all relevant information, Cabinet must determine where the overall public interest is best served. The assessment is that the biodiversity, open space, accessibility and community benefits associated with retaining the land outweigh the

benefits that may arise from disposal and subsequent development and therefore the recommendation in this report is that the land remains in Council ownership.

Compliance with Section 123 of the Local Government Act 1972

- 4.12 As identified in the July 2026 report, the Council is under a statutory duty to ensure that any disposal is undertaken for the best consideration that can reasonably be obtained unless the consent of the Secretary of State is obtained. Section 123 of the Local Government Act 1972 provides:
*“(1) Subject to the following provisions of this section, ... a principal council may dispose of land held by them in any manner they wish.
(2) Except with the consent of the Secretary of State, a council shall not dispose of land under this section, otherwise than by way of a short tenancy, for a consideration less than the best that can reasonably be obtained.”*
- 4.13 This report does not seek agreement for disposal to a specified organisation nor the terms of that disposal, including the consideration to be paid. If required, any further report after the end of the ACV process will address explicitly compliance with this aspect of section 123. Any heads of terms would also address other relevant issues as necessary such as conditionality on achievement of planning permission and any safeguards such as restrictive covenants.

Other Engagement Undertaken

- 4.14 In addition to the statutory notice process, the Council has had correspondence / engagement with the following stakeholders:
- Cllr Josh Robinson, Cabinet Member with Responsibility for Environment and Communities, Worcestershire County Council
 - Stourport Civic Society – ACV below
 - Worcestershire Wildlife Trust
 - Stourport-on-Severn Town Council resolutions
- 4.15 Stourport-on-Severn Town Council resolved on September as follows “Stourport-on-Severn Town Council resolves to propose that it opposes the proposed sale of part of Burlish Meadows to Kidderminster Harriers Football Club and the subsequent loss of the natural habitat”. It also resolved to *“request that Wyre Forest District Council:*
- a) commission a comprehensive, contemporary ecological assessment of the whole of Burlish Meadows (Burlish Country Park) to establish the present extent, composition and condition of the restored habitats; and*
- b) formally consider designating the site as a Local Nature Reserve (under the National Parks and Access to the Countryside Act 1949), in consultation with Natural England and Worcestershire Wildlife Trust, in light of that assessment.*

This Council further resolves that, following assessment, the boundary of the site to be designated a Local Nature Reserve be defined to be in accordance with the Local Plan review.”

The Cabinet is not planning to seek LNR designation.

- 4.16 Partner organisations, including other local authorities, are not supportive of the proposal. The responses from Cabinet Member with Responsibility for Environment and Communities, Worcestershire County Council and Worcestershire Wildlife Trust are among those received during the consultation period and their objections have therefore been dealt with above. There is no statutory requirement for the Cabinet to consider the other responses received but it is important that the Cabinet is aware of them in reaching its decision.

Asset of Community Value Nomination

- 4.17 Following publication of the statutory notice, Stourport Civic Society submitted a nomination for the land proposed for disposal to be included on the Council's List of Assets of Community Value (ACV) under the Localism Act 2011. The nomination states that the site has strategic significance for biodiversity, supports a wide range of flora and fauna, provides opportunities for informal recreation and contributes to the physical and mental wellbeing of the local and wider community. Officers assessed the nomination against the statutory criteria and decided that the land satisfies the definition of an asset of community value. It was accordingly listed as an ACV on 28 July 2026.
- 4.18 Members should note that the ACV process is separate from both the Council's decision on disposal and any future planning decision. Listing as an Asset of Community Value does not prevent the sale of the land, but can trigger a statutory moratorium process should a qualifying disposal be proposed. Following registration of the site as an ACV, Stourport Civic Society formally notified the Council of its intention to submit a community bid for the asset. This triggered the six-month moratorium period, which will expire on 28 January 2027. During this period the Council cannot dispose of the site. Should Stourport Civic Society submit a formal bid during the moratorium period, the Cabinet will have the option of considering that proposal.
- 4.19 As noted above, the effect of the moratorium period is that Cabinet cannot, at this stage, approve a disposal to a specified organisation or individual. However, Cabinet is not prevented from confirming its intention whether or not to proceed with the disposal of the land. Should Cabinet resolve to proceed, the identity of the preferred purchaser and any final disposal arrangements would be the subject of a subsequent report once the statutory process has concluded. Should Cabinet resolve not to proceed, this does not prevent Stourport Civic Society, or any other eligible community interest group, from submitting a bid before the expiry of the moratorium period, which would be considered separately.

Public Campaigns and Petitions

- 4.20 Alongside the statutory consultation process, organised campaigns have been undertaken both in support of and in opposition to the proposed disposal to KHFC. These submissions count as representations regarding the proposal. They are summarised in appendices 4 and 5.
- 4.21 The Friends of Burlish Meadows campaign has generated significant public engagement in relation to the proposed disposal of land at Burlish Country Park. As at

14 August 2026, the associated Change.org petition had attracted 3,431 signatures from 37 countries, with 3,349 UK signatories, demonstrating both strong local support and wider public interest in the future of the site. Local support is particularly evident in the communities closest to the site, with 458 signatories from Kidderminster, 377 from Stourport-on-Severn and 99 from Bewdley. Collectively, these key locations within Wyre Forest District account for 934 signatories, representing approximately 28.7% of all petition signatories and 29.4% of UK signatories. The petition seeks the retention and protection of the land as part of Burlish Country Park and opposes its disposal. Representations and comments submitted through the campaign raise concerns regarding the potential irreversible loss of biodiversity and wildlife habitats, including rare acid grassland and its function as a wildlife corridor; the impact on public access, recreation, health and wellbeing; the loss of valued green space; the Council's environmental and nature recovery objectives; and the long-term future of the Country Park. Representations also refer to concerns regarding cumulative development pressures, transparency in decision-making, and the availability of alternative sites for the proposed football training facilities. The scale of support demonstrated through the petition, together with the substantive comments received, reflects a significant level of community interest, attachment to the site and concern regarding its future. The issues raised through the petition and associated representations have been considered in the preparation of this report and are addressed, where relevant, within the sections relating to biodiversity, environmental impacts, public open space, consultation responses, strategic considerations and the Council's statutory duties.

- 4.22 Kidderminster Harriers Football Club has also undertaken a public petition supporting the proposal. As at 11 August 2026, the Club reported that 1,111 people had signed the petition in support of the principle of expanding sporting facilities at Burlish Meadows. There is no breakdown of where supporters of the petition live. Supporters of the proposal identified a range of anticipated benefits including opportunities for increased youth participation in sport, improved football facilities, investment in community infrastructure, health and wellbeing benefits, educational opportunities and support for women's, girls' and disability football.
- 4.23 Cabinet should note that neither petitions nor campaigns are determinative of the outcome: it was not a referendum. There are more people who oppose the proposed disposal than support it. However, the weight to be given to any representation is a matter for Members, having regard to the substance of the issues raised rather than solely the number of representations received.

Biodiversity and Environmental Considerations

- 4.24 The Council is subject to the enhanced biodiversity duty contained in section 40 of the Natural Environment and Rural Communities Act 2006, as amended by section 102 of the Environment Act 2021. The duty applies to the exercise of all Council functions, including decisions relating to the management and disposal of land. The legislation provides that the "general biodiversity objective" is the conservation and enhancement of biodiversity in England through the exercise of public functions. Section 40 of the 2006 Act requires that:
- (1) the Council "must from time to time consider what action the authority can properly take, consistently with the proper exercise of its functions, to further the general biodiversity objective"

- (2) after that consideration, the Council “must (unless it concludes there is no new action it can properly take)—
 - (a) determine such policies and specific objectives as it considers appropriate for taking action to further the general biodiversity objective, and
 - (b) take such action as it considers appropriate, in the light of those policies and objectives, to further that objective”.
- (3) in complying with these duties, the Council “must in particular have regard to—
 - (a) any relevant local nature recovery strategy, and
 - (b) any relevant species conservation strategy or protected site strategy prepared by Natural England”.

In considering whether to dispose of the land, Members should have regard to these statutory duties and the biodiversity interests associated with the site. This consideration is separate from, and does not prejudice, any future determination of a planning application, which would be considered on its own merits under the relevant planning legislation, policy framework and supporting evidence.

- 4.25 Dealing with limb (3) first, Worcestershire’s Local Nature Recovery Strategy was adopted by the County Council in February 2026. It was not therefore possible to have regard to it when the Council’s biodiversity policy was put in place. If the Council was to consider again under limb (1) what action it can take to further the general biodiversity objective, it would have to have regard to the LNR Strategy. The LNR Strategy contains no specific commitments in respect of Burlish Country Park. The plan includes “Biodiversity Priority 26: Increase the extent of acid grassland and heathland habitats under restoration and in good condition”. In the local habitats map that forms part of the LNR strategy, the whole of the area being considered for disposal is covered by Potential measure 30 “Create or Enhance Species-rich Acid Grassland and Lowland Heathland”

Potential Measure Unique ID	Potential Measure Title	Potential Measure Description	Mapped Status
Potential Measure 30	Create or enhance species-rich acid grassland and lowland heathland	Create new and/or enhance existing areas of acid grassland and heathland. Seek to buffer, extend and connect the areas of priority habitat which are under restoration and appropriate management and aim to increase botanical species-richness as appropriate to the habitat type. Consider the potential contribution of field margins, roadside verges and other linear corridors in enhancing habitat connectivity between sites. Take a habitat mosaic approach to incorporate scrub, fen and ponds where appropriate. Note that acidic fen and mire habitats are rare within the county and should be conserved and enhanced through the naturalisation of hydrological regimes. Allow for periodic disturbance to make areas of bare ground suitable for use by invertebrate species or by plant species that are intolerant of competition.	Mapped

Potential measures are explained in the following terms: “The Potential Measures for the Worcestershire LNRS are suggested practical actions that can be taken to achieve the biggest gains for nature. The LNRS is not a delivery plan. Landowners are not obliged to deliver the opportunities identified. It does not prevent land use change.”. However, PM30 is a mapped potential measure which “are suggested for a specific location where the best gains for nature are likely to be achieved. This may be a site where important habitats or species may already exist or where the landowner has told us they are committed to delivering nature recovery activity, or activities suggested for delivery across a wider defined area, where delivery is likely to require cooperation from multiple landowners”. WFDC’s commitment is set out in the published biodiversity strategy.

- 4.26 If the Council were to reconsider, under section 40, what action it can properly take to further the general biodiversity objective, it would need to have regard to the inclusion of the site within Potential Measure 30 of the Worcestershire Local Nature Recovery Strategy and to the aspirations contained within the Council's Biodiversity Policy. Members may therefore wish to consider the extent to which the proposed disposal, and any potential subsequent change in land use, would align with or depart from those biodiversity objectives and aspirations. This consideration forms part of the Council's exercise of its landowner and disposal functions and does not prejudice the determination of any future planning application.. The Council's biodiversity policy (last updated September 2024) is the document that deals with the duties outlined in section 40. The aims of the policy include "Conserve and enhance biodiversity on all WFDC land holdings through protection, restoration and sustainable management". The policy then goes on to identify a number of specific actions that the Council will take, which is its response to the duty referred to in paragraph 4.25 above. The actions include the following that relate to all open spaces and parks including Burlish Country Park:

Establishment of management plans for biodiversity enhancements across open spaces.

Parks and other green spaces can offer a variety of biodiversity opportunities. These should be investigated and fed into a management plan for each site.

- 4.27 The Country Park is not managed in the same way as more formally laid out parks such as Brinton Park. The latter has planted flower beds, ornamental ponds, play equipment and a splash pad and large areas that are mown regularly. The Country Park has a far more natural feel because the vast bulk of the site is being managed for biodiversity including natural grazing by cattle. The management plan for Burlish Country Park does not and would not envisage replacing 8.5 hectares of the park with development, whether football pitches or otherwise. Consequently, the proposed disposal, if it was for a development, may not fully align with the actions that the Council has identified it will take under the duty in section 40.
- 4.28 The available ecological evidence indicates that retention of the land in its current use offers greater opportunities for biodiversity enhancement. The extent of any ecological impacts arising from development would require detailed assessment through any future planning application. The site has ecological significance, including its potential for the creation of acidic heathland habitat, and supports a range of protected and priority species, such as grass snake, slowworm and tower mustard, as well as species such as the Green Winged Orchid which is classified as "near threatened". Development is therefore likely to result in some adverse ecological impacts, although appropriate mitigation measures would need to be considered through any future planning application. It is acknowledged that the land contributes to the Council's biodiversity and nature recovery objectives and retention of the land would provide greater opportunity for biodiversity enhancement, whereas development of the site has the potential to result in adverse ecological effects. However, those impacts (which would have to be considered in detail as part of any planning application) need to be balanced against the wider benefits arising from the proposal. The Biodiversity Policy requires biodiversity considerations to be integrated alongside the proper exercise of the Council's wider functions and responsibilities,

rather than treated as the sole determining factor in decision-making. Members should therefore have regard to the extent to which the proposed disposal accords with, or departs from, the aspirations of the Biodiversity Policy. Biodiversity considerations form an important part of the decision-making process and are one of a number of relevant considerations which Members must take into account when exercising the Council's functions. Members are entitled to weigh biodiversity considerations alongside the other relevant factors identified within this report when determining whether the proposed disposal is in the overall public interest.

- 4.29 Relevant provisions of the Worcestershire Local Nature Recovery Strategy (LNRS) have been considered above and as part of the consideration of representations received. Inclusion of the site within the Potential measure 30 map does not constitute a statutory nature conservation designation and does not, in itself, preclude the disposal of land or determine the acceptability of future development proposals. The LNRS is a strategic framework intended to guide and support nature recovery actions across the county. Any future planning application would be considered on its own merits, having regard to the LNRS, the development plan, national planning policy and all other material planning considerations.
- 4.30 Development of the land, whether for sports facilities or otherwise, would alter the ecological character of the affected area. This paragraph addresses the specific implications of the introduction of built infrastructure as set out in the updated vision from KHFC (appendix 6): it does not include artificial playing surfaces but would have intensively managed grass pitches. The extent of any ecological impacts would depend upon the detailed proposals brought forward. Matters such as habitat loss, protected species, lighting impacts, biodiversity net gain and mitigation measures would require detailed assessment through any future planning application process. If the Cabinet were, at the end of the ACV process, to decide to dispose of the land to KHFC, the following impacts can be predicted:
- it will concentrate visitor footfall within the remaining area of the Country Park;
 - it may result in the introduction of lighting (whether permanent or temporary) associated with the development, which may adversely affect nocturnal and crepuscular wildlife by creating barriers to movement and disrupting established foraging routes through the landscape. The Vision document does not mention provision of lighting and no planning application has been received;
 - it will likely lead to the application of fertilisers to grass sports pitches, which may leach into surrounding soils, potentially prejudicing future acidic meadow creation, reducing floral diversity and encouraging the spread of amenity grasses and other nutrient-tolerant species;
 - it will require ongoing sports pitch maintenance and associated land management practices that may alter the hydrology of the site.
- 4.31 In reaching its decision, Cabinet must have regard to the Council's statutory biodiversity duty under section 40 of the Natural Environment and Rural Communities Act 2006, as amended. Members must have regard to the potential biodiversity implications of the proposed disposal and the Council's duty to conserve and enhance biodiversity. The statutory duty requires biodiversity considerations to be taken into account as part of the decision-making process. However, it does not require biodiversity interests to prevail over all other considerations in every case. Members are entitled to weigh biodiversity

considerations alongside all other relevant matters, including the Council's statutory obligations, community wellbeing, sporting provision, financial stewardship of public assets and wider strategic objectives, in determining whether the proposed disposal is in the overall public interest.

- 4.32 It is acknowledged that retaining the land in its current ownership and management would provide greater opportunities to further biodiversity objectives than disposal and potential development of the site. Disposal should therefore not be regarded as a biodiversity enhancement measure in itself.
- 4.33 Members should therefore consider the proposed disposal on the basis of the biodiversity impacts identified within this report and the information currently available. In doing so, Members may wish to have regard to:
- the justification for the disposal of the site;
 - any reasonable alternatives that have been considered;
 - the biodiversity value of the habitats that would be affected;
 - the opportunities for biodiversity enhancement or compensation within the District;
 - the extent to which the proposal aligns with the Council's biodiversity objectives and duties; and
 - how the Council's wider land management programme will continue to support the conservation and enhancement of biodiversity.

Whilst it would be lawful for a developer to secure biodiversity net gain through off-site units located outside the District, Members should be mindful of the potential implications for biodiversity outcomes within Wyre Forest and the Council's ongoing commitment to conserving and enhancing biodiversity in the exercise of its functions.

30by30 Government Commitment

- 4.34 In July 2026, the Government published its delivery plan for the national "30by30" target to protect and effectively manage 30% of England's land for nature by 2030. Whilst the plan supports nature recovery objectives, it does not place a specific statutory duty on Wyre Forest District Council to maintain a particular proportion of land under nature conservation management. The proposed disposal relates to approximately 8.5 hectares of land within Burlish Country Park which is currently managed in a way that supports biodiversity alongside public access and recreation. Whilst a substantial proportion of the Country Park would remain in public ownership and accessible to the public, disposal of the land would result in the loss of an area currently managed to support biodiversity and nature recovery objectives and may affect adjacent habitats and wildlife connectivity.
- 4.35 The Council does not hold data identifying what proportion of land within the district is managed for nature conservation purposes, nor has it identified any assessment confirming whether the land forms part of England's formal 30by30 land inventory. Any future planning application would be required to consider ecological impacts, mitigation measures and biodiversity net gain requirements through the planning process.

Health and Community Benefits

- 4.36 **Evidence of Need** – it is appropriate for the Cabinet to consider the health and community benefits of the KHFC proposal compared to the current use of the site as part of a country park. The need for additional football infrastructure within Wyre Forest is supported by the Football Foundation's Local Football Facility Plan, which identifies continuing demand for investment in football facilities and improvements to existing provision. The Plan was prepared in partnership with relevant football stakeholders and local partners and identifies the importance of ensuring sufficient capacity to meet current and future demand for participation in football. The evidence highlights growth in affiliated football teams and identifies a continuing need for improvements to pitch provision, including artificial grass pitches and associated infrastructure. The Plan also identifies opportunities to increase participation amongst women and girls, disabled users and wider community football activity. More broadly, the Council's Playing Pitch Strategy has for several years identified the importance of maintaining and enhancing football provision within the district to meet existing and future demand.
- 4.37 Information submitted by KHFC indicates that the Club currently supports approximately 60 teams, including girls' and disability teams, and anticipates future growth in participation. KHFC has advised that existing facilities are operating at or near capacity and that additional land would be required to facilitate future expansion. Whilst the broad direction of travel is consistent with the Football Foundation's assessment of facility need within the district, the Council has not independently verified KHFC's operational data, growth projections, participation forecasts or assumptions regarding future demand. KHFC has not provided information that demonstrates the level of usage of current pitches and what scope exists to intensify usage further (including what will be possible if the two 3G pitches that are the subject of a planning application that is awaiting determination).
- 4.38 Public health challenges remain significant across parts of the district. Rates of childhood overweight and obesity remain above national averages and there are noticeable health inequalities between communities. Worcestershire's Joint Strategic Needs Assessment identifies excess weight, physical inactivity and health inequalities as continuing public health challenges. Public health evidence demonstrates that participation in organised sport and regular physical activity can contribute positively to physical health, mental wellbeing and social outcomes. However, similar benefits can also be derived through other forms of physical activity, including walking, cycling and informal recreation within the adjacent country park. Whilst additional sports infrastructure may provide further opportunities for participation, it is difficult to quantify the extent to which this would generate additional physical activity, as opposed to accommodating existing demand or displacing participation from elsewhere. Furthermore, walking and other informal forms of exercise are generally available at little or no cost and may therefore be more accessible to residents experiencing socio-economic disadvantage. Members may therefore attach only limited weight to the contribution that the proposed sports infrastructure could make towards increasing overall levels of physical activity across the district and addressing wider health inequalities.
- 4.39 **Proposed Community Benefits** – KHFC has submitted an updated Vision document, and supporting business case, that can be found in appendix 6, setting out its aspiration

to create a "Wyre Forest Community Campus for Sporting Excellence". The Vision includes proposals for additional football pitches, artificial grass pitches on land already owned by KHFC, community facilities, educational space, welfare facilities and wider community use opportunities. The document also identifies potential benefits relating to youth football, women's and girls' football, disability football and educational activities. Members should note that these proposals represent the Club's aspirations at this stage. Detailed designs, funding arrangements, operational delivery, planning considerations and future management arrangements remain to be determined. Accordingly, the Council has not independently verified the full extent of the anticipated benefits described within the Vision document and no guarantee can be given that all aspects of the Vision will ultimately be delivered.

- 4.40 Members may nevertheless have regard to the potential community benefits associated with enhanced sporting provision. Evidence submitted by KHFC, supported by wider research, indicates that participation in organised sport can contribute positively to health and wellbeing, community cohesion, volunteering, social inclusion and the constructive use of leisure time. Information provided by KHFC also indicates that future provision would seek to expand opportunities for participation by women and girls, disabled participants and other groups traditionally under-represented in sport. Members may attach such weight to these potential benefits as they consider appropriate.
- 4.41 These aspirations are consistent with the Football Association's Equality, Diversity and Inclusion Strategy, which seeks to increase participation amongst groups traditionally under-represented in football.
- 4.42 **Alternative Options and Site Suitability** - In considering the proposal, Members may have regard to the suitability of the site and whether there are realistic alternative means of meeting the identified need. The land proposed for disposal is immediately adjacent to the existing Kidderminster Harriers training ground and provides an opportunity to expand an established sporting facility as a single integrated site. Information submitted by the Club indicates that, without access to adjoining land, the introduction of additional all-weather pitches could result in a reduction in existing grass pitch provision and constrain future expansion. The proposed disposal would enable any future development to utilise existing infrastructure, access arrangements, parking provision and operational facilities already associated with the training ground.
- 4.43 The Council is responding to a request from Kidderminster Harriers Football Club to acquire Council-owned land adjacent to its existing facilities and is considering the merits of that request in its capacity as landowner. Members should note that the Council has not undertaken a comprehensive district-wide site selection exercise and it remains possible that alternative locations may exist. The purpose of this report is therefore not to demonstrate that no alternative site exists, but to assess the merits of the specific disposal proposal before the Council.
- 4.44 In considering disposal, Cabinet may also have regard to the opportunity to facilitate significant private sector investment in sporting infrastructure that the Council is unlikely to deliver directly, address identified deficiencies in football provision, support health and wellbeing outcomes and secure a capital receipt whilst retaining the majority of Burlish Country Park in public ownership. The proposal would support the long-term

development of an established local sporting organisation and has the potential to generate wider social, economic and community benefits through increased participation in sport and physical activity.

- 4.45 Members may also attach weight to the wider economic benefits arising from construction activity, employment opportunities and the retention of sporting participation, associated expenditure and visitor activity within the district. By increasing local provision, the proposal may reduce reliance on facilities outside Wyre Forest, helping to retain spending associated with training, matches, coaching and events within the local economy. While Members may have regard to the potential environmental and financial benefits associated with reduced travel by local players, teams and families who currently access facilities outside the district, this may be offset by people from outside the district travelling in to play in the teams. KHFC is understood to scout young players from a wide area, as evidenced by the locations of the Harriers Foundation summer courses in 2026 (which included Malvern and Cleobury Mortimer) and they would all be likely to have to travel by car to reach this site.
- 4.46 The potential sporting, health, educational and economic benefits identified in this section are recognised and have been carefully considered. However, many of these benefits remain dependent upon future planning approval, detailed scheme design, funding arrangements and successful delivery. By contrast, the biodiversity, open space and community benefits currently provided by the site are existing and established. Therefore greater weight should be attached to the benefits that are currently being realised through the site's existing use as part of Burlish Country Park.

Balancing Exercise

- 4.47 **Case for Retaining the Land** - there are arguments in favour of retaining the land within Burlish Country Park. Retention would preserve the site's contribution to biodiversity enhancement, habitat creation and nature recovery. It would maintain unrestricted public access to the land for informal recreation such as walking, cycling and informal play which have health and wellbeing benefits, and would avoid the loss of open space identified throughout this report. Retention would also be more closely aligned with the Council's Biodiversity Policy, Biodiversity Action Programme and the original vision for Burlish Country Park as a publicly accessible green space with ecological value. The Council would retain full control over the future management of the land and its contribution to wider environmental objectives.
- 4.48 The principal issue for Cabinet is whether the identified biodiversity, environmental, open space and community impacts are outweighed by the benefits associated with the proposal. Those benefits extend beyond the provision of football facilities and potentially include contributions towards public health objectives, increased participation in physical activity, social inclusion, community cohesion, opportunities for children and young people, educational initiatives, volunteering, economic activity and long-term investment in community infrastructure.
- 4.49 In undertaking the balancing exercise, Members may attach weight to the following potential public benefits:
- significant private sector investment in sporting infrastructure;
 - increased football pitch capacity and enhanced sports provision;

- opportunities to support participation in youth, women's, girls' and disability football;
- health and wellbeing benefits associated with increased participation in physical activity, although it is unclear whether this would be greater than the number of people whose health and wellbeing is benefitted by walking, cycling and informal play;
- potential educational, training and wider community use opportunities, including structured activities for children and young people;
- economic benefits arising from investment and supporting the long-term sustainability of an established local sporting organisation;
- retention of sporting activity, associated expenditure and visitor activity within the district;
- reduced reliance on facilities outside Wyre Forest, with associated environmental and financial benefits from reduced travel; and
- the potential long-term legacy of enhanced sporting facilities within the district.

4.50 Further detail regarding these matters is contained elsewhere in this report. The extent to which these benefits may ultimately be realised will depend upon a range of factors, including the grant of planning permission, the securing of funding, the detailed design of any scheme and its future delivery. Whilst some of the anticipated social, educational and economic benefits cannot be guaranteed at this stage, Members may conclude that the proposal has the potential to deliver investment in sporting infrastructure and increased opportunities for participation in sport within Wyre Forest.

4.51 The principal adverse impacts identified are:

- loss of approximately 8.5 hectares of publicly accessible open space;
- loss of opportunities for informal recreation and public enjoyment of the site;
- adverse impacts on biodiversity, habitats and species, together with reduced opportunities for nature recovery;
- changes to the landscape character of part of Burlish Country Park;
- potential increases in traffic and activity levels associated with future development;
- public concern expressed through consultation responses and petitions; and
- uncertainty regarding the extent to which the anticipated sporting and community benefits will ultimately be realised.

4.52 Having considered all information contained within this report, including consultation responses, biodiversity considerations, competing policy objectives and the Council's statutory duties, Cabinet must determine whether the overall public interest is better served by retaining the land in its current form or by confirming the intention to dispose. The final decision on the purchaser would have to await the outcome of the ACV process.

Planning aspects relevant to the site

4.53 The adopted Local Plan approved in April 2022, contains strategic Policy SP.28 on green infrastructure, which includes provisions relating to the safeguarding and implementation of Burlish Country Park. However, the area also falls within the Minster Road Outdoor Sports Area allocation (Policy SA.S17). Policy SA.S17 supports the development and enhancement of sports facilities on existing

developed sporting sites, including the existing KHFC training ground and Stourport Sports Club. Accordingly, any decision to dispose of the land sits within the wider policy framework, noting that the adopted Local Plan contains policies relevant both to the protection of green infrastructure and the enhancement of sports facilities in this location. The land is designated as Green Belt. The planning merits of any proposed development, including compliance with the Development Plan and Green Belt policy, would be matters for consideration through the determination of any planning application rather than the decision on whether to dispose of the land.

- 4.54 KHFC has sought pre-application advice from the Council. As reported previously, the pre-application discussions indicated that planning officers were generally supportive of the principle of the proposed development, including the engineering works required to level the site. However, any comments provided through the pre-application process represent informal officer views only and do not prejudice the determination of any future planning application. Any application would be considered independently by the Local Planning Authority, having regard to the Development Plan and all other material planning considerations.

Updated Pitch Layout – KHFC Plans

- 4.55 Members should note that the indicative layout referred to in the July report has changed (see appendix 6). The July report envisaged four full-size pitches, of which three were artificial grass (3G) pitches, together with two junior pitches. Since then, Kidderminster Harriers FC have submitted a separate planning application for two 3G pitches on its existing site to meet current capacity, funding and governing body requirements. If approved, these pitches would be delivered on the Club's existing site.
- 4.56 As a result, the current expectation is that if the KHFC proposal proceeds the Burlish site would comprise of grass pitches, including replacement grass pitches for those lost on the Club's existing site. No 3G pitches are currently proposed on the Burlish site, and no planning application has yet been submitted. However, it is important to note that a future 3G pitch could be considered by KHFC if demand increases, particularly to support the growth of the women's game. Any such proposal would be subject to a separate planning application and all necessary assessments.

5.0 FINANCIAL IMPLICATIONS

- 5.1 Disposal of the site would generate a capital receipt and, if the transaction were to proceed, a further report would address compliance with the requirements of section 123 of the Local Government Act 1972. Retention of the site would preserve opportunities for future biodiversity enhancement and open space management, with maintenance costs continuing to be met from the existing Countryside budget. However, retention would not secure the capital receipt arising from a disposal or facilitate the proposed third-party investment associated with the scheme.
- 5.2 If disposal is approved, the capital receipt would be transferred to the Evergreen Investment Fund. Subject to future decisions of Cabinet, this provides an opportunity for investment in parks, nature reserves, open spaces, biodiversity projects and environmental improvements elsewhere within the district. Members may consider

this a means by which wider environmental and community benefits can be delivered from the disposal.

- 5.3 Further due diligence has been undertaken in respect of expenditure incurred by the Council on the part of Burlish Country Park proposed for disposal. This review was undertaken to ensure that only expenditure directly attributable to the land within the disposal area was taken into account, recognising that a number of biodiversity, access and infrastructure improvements undertaken since 2018 have benefitted the wider country park rather than the area proposed for disposal.

- 5.4 The review identified expenditure of approximately £21,960 directly attributable to this area since 2018, comprising:

Improvement	Value	Funding Source
Cattle fencing	£13,050	Council-funded
Ragwort control	£5,000	Countryside Grant
Pedestrian gates	£2,910	Section 106 funding
Tree planting	£1,000	Countryside Grant
Total	£21,960	

- 5.5 These figures are lower than those previously reported, reflecting the completion of a more detailed assessment of expenditure across the wider Burlish Country Park site and the exclusion of costs that cannot be directly attributed to the land proposed for disposal.
- 5.6 The Countryside Grant funding was provided through the Rural Payments Agency and is used by the Council's Countryside Team across a range of sites to support biodiversity enhancement and conservation projects.
- 5.7 In respect of section 106 monies, the specified Purpose is infrastructure for the creation and/or control of access for cyclists and/or pedestrians across Burlish Top Nature Reserve and adjoining land in the District Council's ownership. The installation of the gates met this purpose. The repayment requirement relates to monies that were not spent. This money has been spent and there is thus no requirement for repayment.
- 5.8 In respect of the Countryside Grant, funding was provided through the Rural Payments Agency and is used by the Council's Countryside Team across a range of sites to support biodiversity enhancement and conservation projects. The grant funding has been applied for the purpose for which it was awarded and there is no requirement for repayment. Ongoing site management arrangements remain in place, including the control of invasive and undesirable species such as ragwort. Any trees lost would be replaced as part of the management and conservation practices.

6.0 LEGAL AND POLICY IMPLICATIONS

- 6.1 Cabinet must take account of all relevant considerations and disregard irrelevant considerations when determining whether to proceed with disposal of the land.

In reaching a decision Cabinet should have particular regard to:

- the requirements of section 123 Local Government Act 1972;
- responses received through the public open space disposal process;
- the Council's biodiversity duty under section 40 of the Natural Environment and Rural Communities Act 2006;
- relevant Council policy;
- equality considerations; and
- the wider public benefits and adverse impacts identified within this report.

6.2 The disposal is subject to the requirements of section 123 of the Local Government Act 1972, and the Council has complied with the requirements of section 123(2A) relating to disposal of open space.

6.3 Relevant legislation and policy issues have been referred to throughout this report. The question of compliance with national and local planning policies will be considered by the Planning Committee in examining the planning application in due course.

7.0 IMPACT ASSESSMENT

7.1 An Equality Impact Assessment has been undertaken and is attached at Appendix 3. The assessment identifies both positive and negative impacts arising from the proposal. The proposed development has the potential to increase opportunities for participation in organised sport, particularly for children and young people, support health and wellbeing through increased physical activity, and provide benefits for disabled people through accessible facilities and inclusive opportunities to participate in sport.

7.2 At the same time, the proposal would result in the loss of approximately 8.5 hectares of publicly accessible open space currently available for informal recreation, walking and outdoor activity. Whilst approximately 79% of Burlish Country Park would remain in public ownership and accessible to the public, the assessment recognises that the benefits associated with publicly accessible green space and those associated with organised sport are different in nature and may affect different groups of residents. No evidence has been identified that the proposal would result in unlawful discrimination against any protected characteristic group.

7.3 The Football Foundation has identified a shortfall in artificial grass pitches across the district, and the proposed development would contribute towards addressing this need. However, Burlish Country Park currently provides opportunities for walking, informal recreation, relaxation and access to nature, all of which are recognised as contributing positively to physical and mental wellbeing. The assessment therefore concludes that both the existing use of the site and the proposed sporting use generate health and wellbeing benefits. Due to the absence of detailed local usage data for Burlish Country Park, it is not possible to quantify the relative benefits of the current use compared with those arising from the proposed development. The impact of the KHFC proposal on low-income households is considered in the EIA and they may be disadvantaged through moving from a free to paid for activity.

7.4 In relation to climate change and environmental impacts, the proposal has the potential to increase vehicle movements associated with additional sporting activity

and use of the facilities, which could lead to increased transport-related emissions. However, the proposal may also reduce the need for local players, teams and families to travel outside Wyre Forest to access training and playing facilities, with potential associated reductions in travel distances, costs and emissions; although there could be additional journeys to the district to the extent that players and supported are drawn from areas outside Wyre Forest. The overall transport and climate change impacts would require further detailed assessment through any subsequent planning application process. The proposal would also result in the loss of part of an area currently managed as publicly accessible open space with biodiversity value. These matters are considered elsewhere in this report and would require further detailed assessment through the planning process.

8.0 RISK MANAGEMENT

- 8.1 Reputational Risk** - Burlish Country Park was established following a long-term vision for the former golf course site and is a well-used public asset associated with biodiversity enhancement, informal recreation and public access to green space. The disposal of approximately 8.5 hectares of the country park for potential sporting development has generated substantial public interest and differing views within the community. As a result, there is a reputational risk to the Council regardless of the decision ultimately taken by Cabinet, as any decision is likely to be supported by some stakeholders and criticised by others. Should Cabinet confirm the intention to dispose (even though the identity of the ultimate purchaser cannot be confirmed until the outcome of the ACV process), concerns may continue to be raised regarding the loss of public open space, biodiversity impacts and consistency with the Council's environmental objectives. Conversely, a decision not to proceed with the disposal may attract criticism regarding the potential loss of investment opportunities and the ability to support sporting and community infrastructure within the district. This risk can be partially mitigated through a transparent decision-making process, careful consideration of all objections and representations received, and a clear and reasoned explanation of the factors taken into account by Cabinet. However, the reputational risk cannot be entirely eliminated.
- 8.2 Legal Challenge Risk** - As with any significant Council decision, there is a risk of challenge by way of judicial review. Given the level of public interest and the competing environmental and community considerations involved, the risk of challenge may be higher than for routine asset disposals. This risk is mitigated through compliance with statutory consultation requirements, consideration of all representations received, proper regard to the Council's biodiversity duty and section 123 requirements, and the provision of clear reasons for the decision reached.
- 8.3 Planning Risk** - Any future development of the site would be subject to the grant of planning permission. The Council's consideration of the proposed disposal does not prejudice the determination of any future planning application, which would be considered independently by the Local Planning Authority having regard to the Development Plan and all other material planning considerations. Any disposal would be conditional upon the grant of planning permission and satisfaction of other necessary conditions. Accordingly, the principal planning risk rests with the prospective purchaser rather than the Council.

- 8.4 **Delivery and Community Benefit Risk** - Many of the anticipated educational, health, community and sporting benefits identified within KHFC's Vision document are dependent upon securing funding, obtaining planning permission, detailed design development and successful implementation of the project. There is therefore a risk that some or all of the anticipated benefits are not delivered in the manner currently envisaged. This risk may be mitigated through contractual obligations, community use arrangements, development milestones and other legal safeguards included within the transaction documentation.
- 8.5 **Financial Risk** - There is a risk that market circumstances, future costs or failure to complete the transaction could impact the financial benefits expected from the disposal. Independent valuation advice, legal due diligence and appropriate contractual protections assist in mitigating this risk.
- 8.6 **Strategic Risk** - The proposed disposal engages a number of competing strategic objectives. Some stakeholders may view the disposal as being inconsistent with previous Council decisions relating to the establishment and promotion of Burlish Country Park, biodiversity enhancement and environmental objectives. However, the site also forms part of the Minster Road Outdoor Sports Area identified in Policy SA.S17 of the adopted Local Plan, which states that proposals for the development of outdoor sports facilities within the area will be encouraged, subject to compatibility with Green Belt, landscape and nature conservation policies. The strategic risk therefore arises not from a direct conflict with the Council's policy framework, but from the need to balance competing objectives relating to biodiversity, open space, recreation, health and sporting provision. Regardless of the decision reached by Cabinet, there is potential for criticism from stakeholders who attach differing weight to those objectives.
- 8.7 **Risk associated with not proceeding with disposal** - A decision not to proceed with disposal may attract criticism from those who support the proposal, including those who consider that the development could provide investment in local sporting infrastructure and wider community benefits. There is also a risk that opportunities to secure external investment in sports facilities within the district may not be realised. However, this risk is balanced against the certainty of retaining a publicly accessible green space that contributes to biodiversity, informal recreation and community wellbeing.
- 9.0 **CONCLUSION**
- 9.1 The strength of public opinion expressed regarding the future of Burlish Country Park is against disposal. It is acknowledged that disposal of part of the site would result in the loss of publicly accessible open space and biodiversity impacts when compared with retaining the land in its current form.
- 9.2 The potential sporting, health, educational and economic benefits that may arise from future development have been carefully considered. These benefits are capable of carrying significant weight and may support the future growth of sporting participation within the district. However, many of those benefits remain contingent upon matters that have not yet been determined, including planning permission, funding

arrangements and delivery of the wider vision advanced by Kidderminster Harriers Football Club.

- 9.3 Having considered the legal, financial, environmental and policy matters set out in this report, sufficient information is available to Cabinet to enable a properly informed decision to be made. In particular, Cabinet has to have regard to the Council's biodiversity duty under section 40 of the Natural Environment and Rural Communities Act 2006 and acknowledge that retention of the land would provide greater opportunities for biodiversity enhancement than disposal. The biodiversity and open space impacts identified in this report have therefore been carefully considered alongside the potential sporting, health, educational, community and economic benefits of the proposal. Ultimately, the decision requires a balancing of these competing considerations in order to determine where the overall public interest is best served. In undertaking that balancing exercise, Members may attach weight to the potential health, community cohesion, equality, educational, sporting and economic benefits identified throughout this report, alongside the significant biodiversity, environmental and open space considerations associated with retention of the land.

Appendix 2 Objections and other responses to the disposal and the proposed Cabinet responses

Summary of objection or response	Illustrative quotations from responses	Proposed response by Cabinet
Ecological and Biodiversity Concerns Ecological and biodiversity concerns were the most prominent theme, raised in 605 of the 650 objections (92%). Respondents raised concerns about the potential deterioration of biodiversity, wildlife habitat loss and the loss of an important wildlife corridor. Concern was expressed about the site's ecological connectivity with Burlish Top Local Nature Reserve, Burlish Camp, Devil's Spittleful and the wider acid grassland and heathland network. The site's rare acidic grassland and heathland was repeatedly highlighted, including its status as part of the largest connected block of heath and acid grassland in the county and its description by Natural England as the best-quality acid grassland in Worcestershire. Respondents also referred to the limited remaining heathland in Worcestershire and the wider decline in UK biodiversity. The importance of maintaining the site's Green Belt, green border, conservation and SSSI-related environmental value was also raised repeatedly. The Council's 2019 vision identifying Burlish	"The site consists of rare acidic grassland and heathland, that certain insects, butterflies and birds need to survive. It is one of the most important acid Heathland complexes in Worcestershire." "We are losing so much of our green belt, parks and public green areas at such a rate nature can't keep up." "The work that has gone into the area as a whole to rewild it should be commended, the council's own management has recognised its importance, through the habitat restoration work which has already been undertaken. It now forms part of a wider ecological network which supports wildlife and biodiversity. I myself, have seen Bats, Badger tracks, Foxes, rabbits, Bullfinches, Ground nesting Skylarks, Blackcaps, Green Woodpeckers, Linnets, and hornet Mock Hoverflies to name just a few, in this area alone."	The issues raised are noted. Cabinet recognises the site's ecological importance and its contribution to biodiversity, habitat connectivity and nature recovery objectives. Having considered the Council's biodiversity duties, the Worcestershire Local Nature Recovery Strategy, the ecological evidence available and the consultation responses received, Cabinet has concluded that the potential ecological impacts and associated uncertainties have not been satisfactorily addressed. Cabinet therefore does not consider there to be sufficient justification to support the proposed disposal. Cabinet therefore do not support proceeding with the proposed disposal.

Country Park as a green buffer was referenced. Respondents raised concerns regarding impacts on a wide range of flora and fauna and the site's existing ecosystems. Species identified included rare White-letter Hairstreak butterflies, rare Emperor Moths and the nationally rare Tower Mustard plant. One respondent had reported records of approximately 500 species of moths, identified through day netting and evening LED trapping. Other wildlife reported included Red Kites, House Martins, Skylarks, Yellowhammers, Red-listed Lapwings, Great Crested Newts, Common Lizards, Grass Snakes, Slow Worms, Smooth Newts, Common Frogs, Dragonflies, Damselflies, Great Diving Beetles, Green Tiger Beetles as well as a very rare sighting of a Hummingbird Hawkmoth. Sightings of deer, rabbits and foxes and a wide variety of bird species were also reported. Respondents specifically noted that the area had become an area for Skylark nesting, noting that skylark populations have declined by more than 50% since the mid-1970s, and placed importance on protecting the existing breeding habitat. Concerns also included significant disturbance to protected and priority species and habitat loss resulting from fencing.	"The site supports flower-rich grassland, orchids, breeding Skylarks, White-letter Hairstreak butterflies and the nationally rare Tower Mustard plant. These are not things that can simply be recreated elsewhere once they are lost." "With the county's Local Nature Recovery Strategy just launched and one in six UK species at risk of extinction, it is more important than ever to protect nature-rich spaces like Burlish Meadows." "It is an irreplaceable natural environment that supports a rich diversity of wildlife, including birds, mammals, insects, reptiles, wildflowers, fungi, and countless other species. Every habitat lost to development reduces biodiversity and weakens the local ecosystem. Once these habitats are destroyed, they cannot truly be recreated."	
--	---	--

Respondents raised concerns regarding natural drainage, wetland features and climate resilience particularly in the context of increasing heatwaves and climate change. The proposed artificial turf was identified as a potential source of heat-related impacts, microplastic pollution and the release of plastic fibres and infill into local waterways through surface-water runoff. Concerns were raised regarding the proposed use of the site as a Biodiversity Net Gain site, with respondents questioning whether development would be appropriate given the site's existing ecological value.		
Community Wellbeing Community wellbeing was the second most prominent theme appearing in 448 of the 650 responses. Respondents raised concerns about the proposal's potential impact on mental and physical health, social interaction and the character and identity of the local area. The existing space was valued for providing a range of informal activities, including dog walking, running, walking, birdwatching, photography and geocaching as well as opportunities to socialise and reduce loneliness, particularly for pensioners living	"Burlish Meadows is a well-used public space enjoyed by dog walkers, ramblers, families, and others seeking access to nature. Losing this open green space would reduce opportunities for recreation and wellbeing for the wider community." "It is an accessible greenspace which I and the local community value greatly and is used daily for a variety of benefits including mental health and wellbeing, and physical health." "It provides somewhere for walking, exercise, wildlife watching, family time	The comments are noted. Cabinet recognises the significant contribution that Burlish Country Park makes to the health, wellbeing and quality of life of residents through opportunities for informal recreation, access to nature and social interaction. Whilst organised sport can also deliver community benefits, Cabinet considers that the wellbeing benefits associated with retaining the land as publicly accessible open space should be given greater weight in this instance.

alone. Respondents felt that these benefits extend beyond recreation, contributing to community pride, local identity and community's connection with the area. Health and environmental concerns were also prominent. Respondents highlighted the potential for increased traffic and poorer air quality with risks to physical health, while also stressing that healthy ecosystems support public health and food security. Some questioned the use of football provision as an argument for tackling obesity describing this as overly simplistic given the wide range of social, lifestyle and health factors influencing obesity. Concerns were also raised about potential astro-turf risks, including chemical exposure, injuries and heat-related risks. Some respondents considered the wider community impacts, including whether Coffee Loco, a popular local cafe could lose trade. It was also raised that, if the disposal goes ahead, it will destroy the community's trust and respect for WFDC.	and quiet reflection. For many people it is also important for their mental wellbeing. Once public open space is sold or leased for intensive development, it is very unlikely ever to return to the community in the same form." "I live with mental health difficulties, and spending time walking through the meadows provides a sense of calm and peace that I struggle to find elsewhere. Being surrounded by wildlife, listening to birdsong, and escaping into nature helps reduce my stress and anxiety and allows me to cope with daily life. Losing this space would have a genuine and lasting impact on my wellbeing."	
Loss of Public and Green Space The loss of public and green space was another significant theme, raised in 305 of the 650 objections received. Respondents expressed concern that the area is already experiencing a gradual loss of public open	"I'm a resident in Wyre Forest area and regularly use Burlish Meadow for getting out into a green space and fresh air. It is really important to maintain these spaces as much as possible. "	The concerns raised are noted. Cabinet recognises the importance of the site as a valued recreational and open space resource. Having considered the information presented and responses received, Cabinet has concluded that the case for disposal

and green space, lessening the opportunities for people to connect with nature. The responses highlighted the importance of such spaces for physical, mental, and social health.	“I am deeply concerned about the loss of green space” “Loss of valuable public open space”	has not demonstrated sufficient public benefit to justify the loss of part of the site and therefore does not support proceeding with the proposed disposal.
Previous Investment and Work Concern regarding the amount of previous work and investment that has been put into the area was raised in 210 objections. Respondents highlighted the considerable investment of public funding, volunteer time and additional works that have taken place at Burlish Meadows over recent years. This included funding and work undertaken by Wyre Forest District Council, Worcestershire County Council and Worcestershire Wildlife Trust through programmes such as Natural Networks for projects such as rewilding and habitat improvement and work to increase habitat for the bee species associated with this type of meadow. The site has also benefited from wider national and international investment, including funding from the European Regional Development Fund and the UK Shared Prosperity Fund. Objections questioned the rationale for disposing of a site where significant resources have already been invested with some asserting this is potential misuse of previous public expenditure.	“Support via the Worcestershire County Council and Worcestershire Wildlife Trust’s Natural Networks programme offered both grant funding and extensive staff time to support this work.” “WFDC have already spent around £22,000 of local taxpayers money in fencing, improved pathways, kissing gates and tree planting in this area since 2018.”	The responses are noted. Any external funding was secured in good faith based on the position at that time: the allegation of “misuse” is rejected. The Cabinet is aware of the potential that some external funding may have to be repaid if the disposal proceeds; and recognises that staff time spent on improving the disposal area will have been nugatory (although will have had temporary benefits). Cabinet considers that retaining the land will allow the benefits of that investment to continue to be realised.

Alternative Site/Location Options Calls for KHFC to consider an alternative location were raised in 182 objections, with concerns that insufficient consideration had been given to whether the proposed development could be accommodated elsewhere. Respondents called for alternative sites to be assessed including brownfield, existing sports facilities, or previously developed land rather than using existing green space. Objections raised concerns about failure to properly assess alternatives including determining if alternative land could accommodate some or all the proposal. A few respondents questioned why the KHFC pitches were proposed to be built in Stourport rather than Kidderminster suggesting that locations in Kidderminster would be more suitable. One respondent stated that the Council has allowed Stourport Leisure centre to lie unused for years: why can this not be developed for the Harriers?	“I ask the Council to consider alternative locations that could meet the Football Club’s needs instead of disposing of valuable public open space” “I ask the Council to carefully consider whether there are alternative locations capable of meeting the Football Club’s requirements without disposing of valuable public open space. I have no problem with the Harriers wishing to develop their facilities - just not on Burlish Meadows”	The points raised are noted. Apart from the Aggborough stadium, KHFC’s operations are already based in Stourport. The Council is not obliged to identify an alternative site. Instead it has to consider the proposal that it has received. The proposed site is adjacent to land already owned by KHFC, and it is reasonably apparent that co-location would be more efficient. The Stourport Leisure Centre site is not owned by WFDC and would be too small to accommodate the proposed pitches.
Accessibility The potential loss of an accessible space was raised in 162 of the 650 objections. Respondents emphasised the site's long history of public access and its role as an open space that can be used by people of different ages and circumstances. Its relatively flat terrain was identified as	“The particular area earmarked to be sold off is frequently used by people who have limited mobility as this is the flattest area of the meadows and it will restrict significantly their ability to exercise freely especially as it is right next to the car park. “	The comments are noted. Cabinet recognises the site's value as an accessible area of open space used by a wide range of residents and visitors.

supporting physical accessibility for people with limited mobility, while its free and unrestricted access was considered particularly important in contrast to organised sporting facilities that may require substantial subscription fees. Responses also highlighted the site's value as an area for recreation away from traffic, i.e. a safe space for children to play away from roads and for dog walking. Some respondents specifically highlighted that this part of the meadows provides a safe place for women to walk alone. Concerns were raised about potential disposal disproportionately affecting people with protected characteristics.	"It is also a free and accessible green space which provides physical and mental health benefits to the local community. Places like Burlish Meadows give people somewhere to walk, exercise, spend time outdoors and connect with nature without needing to travel or spend money." "On our walks, we regularly meet elderly people, often solo females. They feel safe enough to walk there alone (myself included) as the low growing vegetation enables you to see for some distance around you. There aren't the groups of intimidating teenagers carrying sling-shots or balaclava clad youths on e-bikes to contend with as in other parts of Stourport"	The equality impact assessment considers the impact on people with protected characteristics.
Traffic and Parking Concerns Concern regarding the potential increase of traffic and parking pressure was raised in 116 objections. It was stated that Burlish Crossing is an existing bottleneck, with traffic regularly queuing for up to a mile during busy periods and backing up along Kingsway towards the proposed site. Traffic approaching from this direction must already pass through either Kidderminster Road or the Gilgal both of which experience significant congestion. The additional vehicles that will come with	"Artificial sports facilities, increased activity, additional traffic, lighting and associated infrastructure would inevitably reduce the natural qualities that make Burlish Meadows so special." "This will have a huge impact on wildlife to the area plus add even more traffic and noise pollution." "It is a narrow lane with no public footpath and limited parking. Increased traffic would inevitably create	The concerns raised are noted. Cabinet recognises that a number of respondents expressed concerns regarding planning policy matters. Whilst such matters would normally be considered through the planning process, Cabinet do not support proceeding with the proposed disposal and therefore, no disposal will happen.

evening training sessions, weekend tournaments and other activities could therefore lead to longer journey times, increased noise, higher accident risks, greater harmful emissions. It was requested that the cumulative impact of these additional journeys be properly assessed, including clear evidence that the existing road network has sufficient capacity and details of what mitigation would be provided if congestion worsens. Pedestrian safety was also raised as a concern noting that Kingsway does not have a continuous footpath and is a narrow route with limited parking. An increase in visitor numbers and vehicle movements could create further risks for pedestrians and residents. The limited transport options available were highlighted as they are unlikely to support the number of visitors.	congestion, parking issues and additional safety concerns for local residents.” “The traffic coming off Zortech ave onto the minster road, already notorious for accidents.” “the Council should understand the reasonably foreseeable consequences, including: traffic generation and vehicle emissions; parking demand and highway safety”	
Light Pollution The potential for increased light pollution arising from the proposed disposal was raised in 103 objections. Many respondents considered that the introduction of floodlighting would constitute inappropriate development of the Green Belt, noting that floodlighting would have a significant adverse impact on wildlife including being especially disruptive to night animals including bats, moths and hedgehogs, all of which are	“The inevitable installation of floodlights and the resulting light and noise pollution will severely disrupt nocturnal wildlife, including bats and nesting birds that rely on the surrounding reserves.” “Replacing rare acidic grassland with plastic pitches and floodlights - devastating for nature, after all the money that has been spent rewilding it, and all media footage you have shared	The concerns raised are noted. Cabinet recognises that a number of respondents expressed concerns regarding planning policy matters. Whilst such matters would normally be considered through the planning process, Cabinet do not support proceeding with the proposed disposal and therefore, no disposal will happen.

becoming rarer. Light pollution will directly affect the neighbouring wildlife habitats, with knock-on effects for nocturnal species using the wider Country Park. It was also raised that light pollution would affect nearby residents.	in the past saying how important it was and what a win for nature.”	
Conflict with national / local planning policy Concern that the proposed disposal could facilitate development that conflicts with national and local planning policy was raised in 98 objections. These objections largely related to inappropriate development of the Green Belt. Many respondents specifically referred to Strategic Policy SP28.	“It also runs counter to the National Planning Policy Framework emphasis on protecting priority habitats, Green Belt, and delivering net environmental gains.” “Strategic policy SP.28 in the adopted local plan sets out that the council will ‘safeguard and implement a scheme on land between Kidderminster and Stourport-on-Severn for the development as the Burlish country park. Proposals for development which would prejudice the provision of the country park in these areas will not be permitted.’ This strategic policy would be broken if the sale is permitted.”	The concerns raised are noted. Cabinet recognises that a number of respondents expressed concerns regarding planning policy matters. Whilst such matters would normally be considered through the planning process, Cabinet do not support proceeding with the proposed disposal and therefore, no disposal will happen.
Noise Pollution The risk of noise pollution was raised in 71 objections. Concerns focused on the potential increase in noise arising from additional vehicle movements, football and other sporting activities, and increased visitor numbers. Respondents were particularly	“Noise will drive away wildlife and affect the health of the environment.” “Burlish Meadows is a place that people value because it allows them to connect with nature, enjoy quiet recreation and experience local wildlife.”	The concerns raised are noted. Cabinet recognises that a number of respondents expressed concerns regarding planning policy matters. Whilst such matters would normally be considered through the planning

concerned about the potential impact on wildlife within the country park, including nocturnal animals, nesting birds, and mammals, which could be disturbed by increased noise and activity. Concerns were also raised about the impact on residents and visitors who value the park as a quiet and tranquil space.		process, Cabinet do not support proceeding with the proposed disposal and therefore, no disposal will happen.
Requests for evidence There were 54 requests for evidence, covering a wide range of assessments and surveys, some of which will be considered as part of any planning application. Requested evidence that will be considered during planning included: publication of ecological survey evidence, including bat, bird and invertebrate records; assessments of biodiversity, public use of the site, health and wellbeing, and the long-term environmental value of Burlish Meadows; Phase 1 Geo-environmental Assessment and Phase 2 Ground Investigation; Contamination and Ground Gas Assessments; UXO Risk Assessment; Preliminary Ecological Appraisal; UK Habitat Survey and Biodiversity Assessment; Tree Survey and Landscape and Visual Impact Assessment; Flood Risk Assessment; Transport and Parking Assessments; Climate Change and Carbon Assessment; Playing Pitch Strategy and Open Space Assessment; Options Appraisal	“WFDC's published FAQs state that no independent site-selection exercise or options appraisal comparing Burlish with alternative locations has been undertaken. They also state that, at this stage, WFDC holds no published Ecological Impact Assessment or Biodiversity Net Gain assessment for the proposed disposal area, alongside no Flood Risk Assessment, Climate Change Impact Assessment, Carbon Assessment or Sustainability Appraisal relating to the proposal. I appreciate that several of these assessments would ordinarily arise during a subsequent planning application. But disposal is itself a decision, and once public ownership is relinquished the Council's relationship with the land fundamentally changes.”	Officers have provided any information that is in the Council's possession and in respect of which no exemption applies under legislation on Freedom of Information or Environmental Information. The report has provided Cabinet with sufficient information to reach a decision on the question of land disposal. Having considered the information available, the objections received and the wider public interest considerations, Cabinet is proposing not to proceed with the disposal.

and Financial Viability Assessment; surveys of the surrounding area, including endangered wildlife, traffic, roads and parking; ecological impact and biodiversity net gain; sustainability assessments; Local Plan policy assessment; and an assessment of the Worcestershire Local Nature Recovery Strategy. The remaining requests for evidence include: Health, Equality and Community Impact Assessments; an urgent review of all relevant SSSIs and how these will be legally protected; a comprehensive public benefit analysis; biodiversity-duty advice to be provided to decision-makers before the final decision; evidence demonstrating how each material risk identified in July has subsequently been closed, mitigated or accepted and the basis for that conclusion; publication of an overlay showing the proposed 8.5-hectare disposal boundary against the PM30 mapping; a transparent explanation of the public benefits and losses; a Section 123 assessment and supporting valuation evidence; and a Child Rights Impact Assessment. Proof of current utilisation of current pitches.		
Flood risk and drainage impacts Flood risk and drainage impacts arising from the disposal were raised in 45 objections. Respondents asked the Council to	“Burlish Meadows provides countless benefits beyond its environmental value. It supports physical and mental wellbeing, offers opportunities for	The concerns raised are noted. Cabinet recognises that a number of respondents expressed concerns regarding planning policy matters.

understand and assess the consequences of changing natural land into artificial pitches, particularly the potential impact on surface water drainage, surrounding properties and nearby watercourses. Respondents also asked the Council to publish a Flood Risk Assessment and Surface Water Drainage Strategy setting out how these risks would be managed. Respondents stated these matters should be considered in accordance with the relevant flood risk policies in the National Planning Policy Framework (NPPF) and the Environment Act 2021.	recreation, stores carbon, helps reduce flood risk, and provides an important refuge for wildlife. These are benefits that cannot be measured solely in financial terms.” “Open meadow landscapes provide: carbon storage; cooling during heat events; natural drainage; flood attenuation.” “Destroying farmland and Greenbelt to build more houses would increase runoff and strain existing old flood defences and water systems which are already noted as problematic.”	Whilst such matters would normally be considered through the planning process, Cabinet do not support proceeding with the proposed disposal and therefore, no disposal will happen.
Air Pollution Increased air pollution resulting from the disposal was raised in 35 objections. Concerns were expressed that this could adversely affect the health of residents, visitors, and wildlife due to increased emissions from additional vehicle movements and road congestion, as well as a reduction in vegetation that would otherwise help to absorb pollutants and improve air quality.	“More traffic means higher harmful emissions, worsening air quality for homes, schools and communities nearby.” “Trees and vegetation absorb pollutants from the air, helping to reduce smog and improve air quality.”	The concerns raised are noted. Cabinet recognises that a number of respondents expressed concerns regarding planning policy matters. Whilst such matters would normally be considered through the planning process, Cabinet do not support proceeding with the proposed disposal and therefore, no disposal will happen.
Uncertainty over intended development	“I also wonder if this is part of a larger plan to dispose of the current home for	The concerns raised are noted. Cabinet is proposing not to proceed

Another theme raised in the objections was uncertainty over the intended future use of the land, raised 29 times. Objections expressed concern that the land could ultimately be used for housing development or for the relocation of Aggborough Stadium, rather than being retained for its proposed purpose. Some respondents characterised the proposed disposal as a potential “land grab” and questioned what safeguards would be in place to prevent development. There were also concerns about the implications of the disposal for the future of the remainder of the country park, particularly whether its long-term protection could be guaranteed. Respondents also expressed concerns about the disposal being freehold. A respondent asked whether a covenant restricting the land to outdoor sporting use and directly associated facilities is proposed.	Kidderminster Harriers (selling this land for houses and netting the current owners a significant profit) and move the stadium to this site which would result in more destruction of the environment and our beautiful green open plan spaces which should be for everybody in our district to use freely.” “no doubt you will build new houses across from the new football pitches for the so called housing crisis.”	with the disposal and therefore the issues raised regarding future development of the land do not arise from the current proposal. Cabinet has no plans to dispose of the remainder of Burlish Country Park and recognises the importance of the site's long-term environmental and community value.
Under-utilisation of current pitches The under-utilisation of the existing pitches was raised in 28 objections. Respondents stated that the current pitches are frequently not in use and questioned the need to provide additional pitches when existing facilities appear to have spare capacity. Evidence and data relating to the current use of the pitches were requested.	“What is even more of a concern the are already football pitches present which seem rarely in use” “The lack of a demonstrable need for the new training pitches in view of the apparent under utilisation of the current facilities”	Whilst information regarding existing pitch usage formed part of Cabinet's considerations, Cabinet is proposing that the public interest is best served through retaining the land as part of Burlish Country Park and has therefore decided not to proceed with disposal.

Other responses There were a few objections highlighting the site's important wartime connections. One respondent pointed to Wyre Forest's World War history, including its links to the American Army headquarters. Another raised the fact that injured soldiers were treated at the hospital, while another highlighted General George Patton's famous speech. Concerns focused on ensuring that this significant wartime heritage is not forgotten or lost through the sale of the land. Other responses and objections (usually raised in only one response) were: • community groups should get the chance to purchase Burlish Meadows; • one respondent had their home valued based on the nearby nature/conservation area; • concern that losing the meadows could leave teenagers with fewer places to spend time, and teens may be forced to hang around in the town where feelings of resentment grow; • concerns raised about bullying, intimidation, and the club's treatment of players; • Burlish Meadows attracts geocachers from locally and beyond, with 20 themed caches;	"The land is of historical significance as the scene of a very important address to 1000's of American troops just before D-day, and served as a hospital after D-Day. This venue is often visited and discussed with visitors to the site. It is a very important part of Wyre Forests Wartime history. To view it from Burlish top, the usual location, and, see a jumble of fences, artificial grass and the noise attendant with Football training will completely undermine the aesthetic of the location." "Based on my direct, first-hand experience, the club's culture is deeply concerning. I have been in a dispute with them for weeks regarding their treatment of players, and I can provide an email trail to evidence these dealings. The club has protected coaches who have been reported for bullying and intimidating behaviour."	The responses are noted, although some of them are not relevant either to the planning process (such as the valuation of properties) or to the question of land disposal (such as allegations about matters that are internal to KHFC or local employment during construction). The site has been registered as an asset of community value, which provides an opportunity for a community-led bid to be submitted. Councillor Hart declared his interest as follows on 9 July 2026 and it is a decision for him as to whether to take part in decision-making: "Councillor M Hart declared in respect of agenda item 8.2 – Disposal of part of Burlish Country Park, that he is a season ticket holder at Kidderminster Harriers Football Club and has been for circa 25 years, and he has family members that were also season ticket holders. He also declared that for many years he was a trustee of the Kidderminster Harriers Football in the Community Trust, however he had resigned from that position in November 2025.
---	---	---

• concern that Councillor Hart has taken part in the decision making as this was perceived as a clash of interest; • Public land should be sold openly and competitively, not to a pre-selected buyer; • Doubts that construction work would create jobs for local residents.		He declared that he spoke and voted at the last meeting of full council when there was a notice of motion that supported the club and congratulated them on their success.”
Three responses were received in support of the disposal. One response was generic, while the other two raised a number of specific points including: • the development would provide a much-needed home for the women’s team, that currently plays its matches in Droitwich; • the site is not a designated nature reserve; • the opportunity would deliver economic, sporting and wider community benefits; • Kidderminster Harriers Football Club had begun discussions on environmental protection which should during the potential planning process.	“For me, as well as the obvious benefits that extra pitches mean extra users of all ages, the major gain would be the provision of a pitch and associated facilities for the use by the ladies first team. It seems a nonsense that this team currently plays its matches in Droitwich. We’ve all seen the exponential growth in the women’s game in the UK in the past few years and the area is sorely lacking a team to follow and inspire the next generation of young girls.”	Cabinet notes the support expressed for the proposal and recognises the potential sporting, economic and community benefits identified. These benefits were carefully considered alongside the objections received and the wider environmental, biodiversity and open space impacts. Having weighed all relevant considerations, Cabinet does not support proceeding with the proposed disposal.

Full Equality Impact Assessment- EIA

An EIA is a way of finding out if:

- Our services are accessible to service users and employees.

An EIA helps us to make sure that:

- Our functions and policies do not have a negative impact or discriminate in any way against any members of our local community.

A Full EIA needs to work through the following stages:

- ↓ **Establish clear aims & objectives-** What is the purpose? Who will benefit? What are the intended outcomes?
- ↓ **Consideration of data & information-** National & local data; service data; satisfaction/feedback data; complaints; research
- ↓ **Assessing the impact-** Who does/does not use service? Have you consulted? Does it reflect varied needs of community?
- ↓ **Reviewing/Scrutinising the impact-** Is there a differential impact on different groups? Is it adverse? Is it directly or indirectly discriminatory? *Show justification if applicable*
- ↓ **Addressing the issues-** Measures to alleviate impact; alteration to policy
- ↓ **Formal consultation-** Use appropriate methods; consult those affected or with legitimate interest; consult widely; ensure consultation is open, inclusive & accessible
- ↓ **Making a decision-** Explain decision & intended effects/benefits; monitor any actions
- ⇒ **Publication of results-** Accessible & user friendly; add website & intranet; notify consultees

Name of service or policy being assessed	Proposed disposal of part of Burlish Country Park
Is this a new or existing service or policy?	New decision
Director	Faye Parrett, Director of Commercial Services
Relevant Cabinet Member	Councillor David Ross, Deputy Leader and Cabinet Member for Finance and the Capital Portfolio
Officers completing the assessment	Faye Parrett, Director of Commercial Services Mark Bieganski, Head of Property Services
Date	09/07/2026

What is the purpose? What are the outcomes?	The purpose of this proposal is to consider the principle of the disposal of approximately 8.5 hectares of Burlish Country Park to Kidderminster Harriers Football Club (KHFC) to enable the development of new football training facilities, subject to statutory consultation, planning permission and satisfaction of the Council's obligations to obtain best consideration. The intended outcomes are to support the long-term sustainability of KHFC, increase football participation opportunities, provide enhanced sports facilities, support healthy lifestyles and community engagement. If approved, the disposal would generate a capital receipt, which would be reinvested in other green and open spaces improving those assets for community use and therefore would deliver other outcomes for local residents. Approximately 79% of the country park would remain in public ownership and accessible as public open space
Are there any statutory requirements?	• Section 123 of the Local Government Act 1972 requires the Council to obtain the best consideration reasonably obtainable when disposing of land. • Section 123(2A) of the Local Government Act 1972 requires the Council to advertise its intention to dispose of open space land and consider any objections received. • The Council must comply with the Public Sector Equality Duty under the Equality Act 2010. • The Council must comply with its duty to conserve and enhance biodiversity under Section 40 of the Natural Environment and Rural Communities Act 2006 as amended by the Environment Act 2021. • The proposed development would require planning permission before any disposal could be completed.
Who are the main customer groups / stakeholders?	• Existing users of Burlish Country Park. • Residents of Kidderminster, Stourport-on-Severn and surrounding areas. • Kidderminster Harriers Football Club. • Harriers Foundation • Harriers Academy • Football players, coaches, volunteers and supporters. • Young people participating in football activities. • Families attending training sessions and matches. • Environmental and biodiversity interest groups.

	• Local sports organisations. • Future users of enhanced football facilities. • Wyre Forest District Council and local taxpayers
Who is intended to benefit from this service/policy? How will they benefit?	The principal beneficiaries are expected to be KHFC, Harriers Women, Girls Academy, football participants and the wider community who may gain access to improved sporting facilities. Benefits may include: • Increased opportunities for participation in football. • Improved facilities for youth development. • Health and wellbeing benefits associated with organised sport. • Enhanced volunteering opportunities. • Social interaction and community engagement. • Potential educational opportunities associated with KHFC programmes. • Economic benefits through construction activity, employment opportunities and investment in sporting infrastructure. The wider community may also benefit from investment of the capital receipt into improvements to other green and open spaces within the district, subject to future Cabinet decisions.
What information are you using? What does the evidence show you?	This assessment has been informed by: • Cabinet report "Disposal of Part of Burlish Country Park". • KHFC proposals. • Football Foundation Local Football Facility Plan (February 2025) - Football Foundation Local Plans. • Existing information regarding Burlish Country Park and its management. • Ecological and biodiversity information relating to the site. • Planning pre-application advice referred to within the Cabinet report. • Active Lives Sport England • Active Lives Home • Access to green space in England - GOV.UK • https://www.thefa.com/news/2024/sep/27/women-and-girls-strategy-progress-inspiring-positive-change-20242709 • 'Made for this Game' England Football • UK Chief Medical Officers' physical activity guidelines - GOV.UK

	• Women's and girls' football in England reveals recent growth England Football • Women's and girls' football sees record growth in a historic four years for the game The Football Foundation's Local Football Facility Plan for Wyre Forest identifies a requirement for eight additional artificial grass football pitches to meet current and future demand across the district, whilst identifying no requirement for additional grass pitches. The Kidderminster Harriers proposal would contribute towards addressing this identified shortfall through the provision of new artificial playing surfaces. Sport England's Active Lives Adult Survey reports that 64.6% of adults in England meet the recommended 150 minutes of moderate physical activity per week, representing the highest recorded participation level since the survey began. The evidence demonstrates the importance of accessible sporting infrastructure in supporting physical activity and healthy lifestyles. Conversely, Defra's Access to Green Space Statistics recognise that access to outdoor green spaces is important for physical health, mental wellbeing and quality of life. Burlish Country Park currently provides unrestricted public access to open green space and opportunities for informal recreation. The available evidence therefore identifies both potential benefits associated with enhanced sports provision and potential impacts arising from the reduction of publicly accessible green space. There is currently insufficient local evidence regarding the number and characteristics of existing users of Burlish Country Park to determine the relative significance of these impacts. Sport England's Active Lives Children and Young People Survey identifies football as the most popular team sport amongst children and young people. The Football Association has also reported significant growth in women's and girls' football participation, demonstrating increasing demand for football facilities across a broad range of age groups and genders. The UK Chief Medical Officers' Physical Activity Guidelines recommend that adults should undertake at least 150 minutes of moderate intensity physical activity each
--	---

	week and that children and young people should be physically active daily. The guidance recognises that regular physical activity delivers significant physical and mental health benefits, including reducing the risk of cardiovascular disease, type 2 diabetes, depression and social isolation. The guidance also recognises that physical activity can be accumulated through a wide range of activities including organised sport, walking, recreation and use of parks and green spaces. The proposed development has the potential to support participation in organised sport and structured physical activity through the provision of additional football facilities. Equally, the existing use of Burlish Country Park supports opportunities for walking, informal recreation and outdoor physical activity. The Chief Medical Officers' guidance therefore provides evidence that both the existing use of the land and the proposed sporting use can contribute positively to health and wellbeing outcomes.	
What impact does the service / policy / project have on the protected characteristics as defined by the Public Sector Equality Duty 2010		
Age Impact on people of all ages, inc younger and older people	Positive and Negative	The proposal is likely to have a positive impact on children and young people through increased opportunities to participate in organised sport, football training and associated educational activities. The Football Foundation has identified unmet demand for all weather football facilities within Wyre Forest and the proposed development would contribute towards meeting this need but it also includes grass pitches for which the Foundation has not identified a need. Football is one of the most popular participation sports amongst children and young people in England. Sport England's Active Lives Children and Young People Survey identifies football as the most popular team sport and recent participation data suggests approximately 41% of children aged 5-16 participated in football during the previous week. This indicates that improvements to football infrastructure have the potential to benefit a substantial number of children and young people. The UK Chief Medical Officers' Physical Activity Guidelines identify childhood and adolescence as critical periods for establishing lifelong

		physical activity habits. The provision of additional football facilities may therefore contribute positively to increasing physical activity levels amongst children and young people and supporting long-term health outcomes. There may be adverse impacts on some existing users of Burlish Country Park, including residents of all ages who currently use the site for walking, recreation and informal exercise. Evidence from Historic England, drawing on National Lottery Heritage Fund research, shows that public parks are widely used for physical activity and wellbeing, with 60% of visitors reporting that they undertake more exercise because parks are available. As approximately 79% of Burlish Country Park would remain in public use, any impacts on age groups would be limited.
Disability Impact on people with disabilities, inc physical, sensory and learning disabilities, mental health issues and long-term limiting illnesses	Positive and Negative	The KHFC vision identifies opportunities to improve participation for disabled people through the provision of accessible facilities and inclusive sporting opportunities. This may support greater participation in physical activity amongst groups who are traditionally underrepresented in sport. Sport England's Active Lives Survey shows that disabled people and those with long-term health conditions are significantly less likely to achieve recommended activity levels than the general population. Improved accessible sports facilities therefore have the potential to provide positive equality benefits. However, disabled residents may currently benefit from access to informal outdoor recreation and greenspace at Burlish Country Park. Defra's statistics acknowledge that access to green space contributes positively to health and wellbeing, which may be particularly important for people managing physical or mental health conditions
Gender Impact on people of different genders, inc transgender / gender reassignment	Neutral	No adverse impacts have been identified. Football has historically attracted higher participation from males; however, national evidence demonstrates significant growth in women's and girls' football. The Football Association

		(FA) reports that the number of women's and girls' teams in England has more than doubled since 2016/17, increasing from 5,632 to 12,150 teams. Women and girls nevertheless continue to represent a minority of overall participants. The FA reports that more than 845,000 girls now participate regularly in football, and that participation by women and girls has increased by 56% since 2020. Accordingly, the proposed facilities would support the needs of all participants, including the growing proportion of women and girls involved in the sport. The proposal would provide additional football facilities that would be available to participants regardless of sex and would therefore support both existing demand and the continued growth of women's and girls' football. The development is not expected to have any differential adverse impact on males or females and has the potential to deliver a minor positive effect by increasing the availability of facilities that can be used by under-represented groups within the sport. Subject to the detailed design and future operational arrangements, the facilities would be expected to be designed and managed in accordance with the Equality Act 2010 and relevant good practice guidance, including the provision of inclusive access and appropriate ancillary facilities. Further details would be considered during the planning and design stages.
Sexual orientation Impact on people who are gay, lesbian or bisexual	Neutral	No evidence has been identified that the proposal would have a differential impact on people based on sexual orientation. The facilities would be available irrespective of sexual orientation and no adverse impacts have been identified at this stage.
Religion or belief Impact on people who practise different religions or have different beliefs (inc non-belief)	Neutral	No evidence has been identified that the proposal would have a differential impact on individuals based on religion or belief. No adverse impacts have been identified at this stage.

Race Impact on different ethnic groups, inc migrant communities and Gypsies/Roma/Travellers	Neutral	The proposal has the potential to provide sporting opportunities for individuals from all ethnic backgrounds. Sport England evidence demonstrates that some protected and disadvantaged groups have lower levels of participation in physical activity than the wider population. Additional sports infrastructure may create opportunities to increase participation amongst these groups where facilities are designed and operated inclusively. No evidence of differential impact has been identified at this stage.
Other e.g. Deprivation, health inequalities, urban/rural divide, community safety, marriage & civil partnership, pregnancy & maternity.	Positive and Negative	The proposed development may contribute positively to health and wellbeing by increasing opportunities for participation in organised sport and physical activity. Sport England reports that physical activity levels are lower amongst people living in deprivation, disabled people, older people and some ethnic minority communities. Additional sports infrastructure may help support participation amongst these groups where facilities are designed and managed inclusively. However, the proposal would reduce the area of publicly accessible open space available for informal recreation. Defra identifies access to green space as an important contributor to physical and mental wellbeing, while national research demonstrates that parks are widely used for walking, exercise, relaxation and social interaction. Historic England reports that 95% of users describe park visits as enjoyable, peaceful and relaxing and that 60% undertake more physical activity because parks are available. Sport England evidence demonstrates that physical activity levels remain lower amongst older people, disabled people and residents living in more deprived communities. Similarly, the UK Chief Medical Officers' Physical Activity Guidelines identify physical inactivity as a significant public health challenge and recognise the importance of increasing opportunities for people to be active. The proposal has the potential to support participation in organised sport and increase opportunities for physical activity amongst groups that are currently underrepresented in sport and recreation.

		However, it should also be recognised that public parks and open spaces play an important role in supporting free and accessible physical activity, including walking, informal recreation and opportunities to improve mental wellbeing. Unlike publicly accessible green space, participation in organised sport can involve costs associated with membership, equipment, travel or pitch hire. The extent to which this may affect residents from lower-income households will depend on future community access arrangements and pricing structures, which are not yet known. The health and wellbeing benefits associated with both organised sport and publicly accessible green space should therefore be taken into account when considering the overall impact of the proposal. Given the absence of local usage data for Burlish Country Park, it is not currently possible to quantify the relative health benefits of the existing use compared with the proposed sporting use.
Review		
Can any differential impact be justified? (e.g. promoting equality of opportunity)	Yes	The adverse impact arising from the loss of part of the publicly accessible open space would need to be balanced against the anticipated benefits of increased sporting participation, youth development opportunities, health and wellbeing outcomes and community engagement. The Football Foundation has identified a significant shortfall in artificial football pitches across Wyre Forest, and the proposed development would contribute towards addressing this recognised need. However the Foundation has not identified the need for additional grass pitches. At the same time, national evidence demonstrates that access to green space delivers important health and wellbeing benefits and should therefore remain a material consideration in the Council's decision-making process. Approximately 79% of Burlish Country Park would remain accessible as public open space.
Does any adverse impact amount to unlawful discrimination?	No	No evidence has been identified that the proposal would directly or indirectly discriminate unlawfully against any protected characteristic group.

What alternative actions could be taken to mitigate any adverse impact?	• Consider consultation feedback when determining whether and how the proposal should proceed. This includes the option of not proceeding with the proposal so that public access is retained for the whole of the country park and adverse impact on biodiversity would be avoided • Retain and improve public access to the remaining country park • Ringfence capital receipts for investment in alternative green and open spaces. • Secure community use arrangements for the football facilities so that there would be some free access throughout the year. • Ensure accessible and inclusive design principles are incorporated into any development. • Require biodiversity mitigation and enhancement measures through the planning process. • Monitor the equality impacts following implementation.		
Consultation			
Detail any specific consultation on this service/policy <i>(if there is insufficient data, further consultation will need to be undertaken)</i>	At the time of this assessment, statutory notice on the proposed disposal of open space has not yet been completed. The Council has advertised its intention to dispose of the land in accordance with Section 123(2A) of the Local Government Act 1972 and will consider all responses received before making a final decision. The results of this consultation will inform the final Equality Impact Assessment. The Council does not currently hold comprehensive data regarding visitor numbers, frequency of use or the demographic characteristics of users of Burlish Country Park. As a result, the assessment has relied on national evidence relating to the benefits of public open space and participation in organised sport. This limitation should be recognised when considering the findings of the assessment.		
Conclusion			
Can the service/policy proceed?	Yes, subject to:		

	• Completion of statutory consultation and consideration of consultation responses, with disposal to proceed only if all objections can reasonably be set aside. • Demonstration that disposal complies with statutory duties on the council. • Completion of legal and financial due diligence. • Planning permission being granted. • Review of the final Equality Impact Assessment prior to any final disposal decision.
How will the service/policy be monitored and reviewed? (please give timescale)	The Equality Impact Assessment should be reviewed following completion of the statutory consultation process and prior to the final Cabinet decision on disposal. Should the proposal proceed, equality impacts should be monitored through implementation of the development, including consideration of accessibility, community use, participation levels and any issues raised by local communities. A review should be undertaken within 12 months of implementation of any approved development.

Kidderminster Harriers Petition – Proposals for Land at Burlish Meadows

Report date: Tuesday 11 August 2026

Produced by: Luke Thompson, Digital & Content Manager, Kidderminster Harriers Football Club

Introduction

On 2 July 2026, Kidderminster Harriers Football Club launched a petition to demonstrate the strength of community support for its proposals to expand junior and community football provision on land at Burlish Meadows, adjacent to the club's existing training ground at Zortech Avenue, Kidderminster. The petition invites local residents, supporters and the wider community to back the club's vision for additional sporting facilities in the area.

The proposals would provide additional space for four full-size pitches, including artificial grass surfaces, alongside junior pitches and facilities to support the continued growth of the club's youth pathway, Academy and education programmes. The facilities would also have the potential to benefit schools, grassroots clubs, community groups and other local users.

The petition was launched against the backdrop of significant growth in the number of young people involved with Kidderminster Harriers. The club's youth pathway has grown from ten teams in 2023 to 60 teams and more than 700 young players last season, with around 800 players expected for the forthcoming campaign and a projected 1,000-plus by 2030. The club says this growth has created increasing demand for high-quality, reliable sporting facilities.

As of Tuesday 11 August 2026, 1,111 people have signed the petition, providing a clear indication of the level of support expressed to date.

The comments in this report are the responses submitted through the petition. They provide a direct record of views expressed by members of the local community, parents, players' families, supporters, grassroots football participants and others. The comments cover a range of themes, including youth development, access to sport, community facilities, health and wellbeing, grassroots football and the future of Kidderminster Harriers. They also include individual observations and questions about the proposals and the use of the land.

The full comments are reproduced below to provide an accessible record of the feedback received through the petition and to illustrate the breadth of views shared by respondents.

1.

A considered and measured (accounting for public access and maintaining bio diversity) and thought has gone into this to purchase and use the space for the benefit of the community.

Once the process has gone through due diligence and legals to acquire, and then develop as planned will be fantastic for the area.

Best of success.

2.

A wholly proportionate development, with minimal impact on the local environment, providing huge long-term community benefit.

3.

An excellent idea that I think would be welcomed by most people. Expanding on the club's facilities would support the continued growth.

4.

Anything which encourages children into sport has to be encouraged and this is an excellent scheme.

5.

As a coach at Kidderminster Harriers and a full-time lecturer within the Academy, I see first-hand the positive impact the club has on young people both on and off the pitch. The growth of the club in recent years has been remarkable, but it has also created a genuine need for additional, high-quality facilities to meet increasing demand.

These proposals will not only benefit Harriers players but will provide lasting opportunities for local schools, grassroots clubs, community groups and the wider public. Investing in modern sports facilities will help improve participation, support physical and mental wellbeing, and create a safe environment for young people to develop, learn and thrive.

I fully support this proposal as a long-term investment in the future of our community, ensuring that high-quality sporting and educational opportunities remain available for generations to come.

I fully support this proposal as a long-term investment in the future of our community, ensuring that high-quality sporting and educational opportunities remain available for generations to come.

6.

As a coach this is very much needed for the development of the kids who mostly live around the area.

7.

As a parent of 3 children who have been and are currently part of the Kidderminster harriers pathway I wish to state my whole hearted support towards the improvement plans that they are proposing for the club and community.

8.

Brilliant stuff for the whole community.

9.

COYR

10.

Essential that young people have the opportunity and facilities to engage in sport for their mental and physical health.

11.

Fantastic idea to develop children of the future

12.

Fantastic idea to increase sporting activities in young people and a great asset to the overall community.

13.

Football brings kids together in doing fun exercise, they make friends and gets them out the house and off computers, brilliant idea Kidderminster Harriers keep up the great work ■

14.

fully

supported most people complaining did not know the area existed until you wanted to develop it

15.

Good luck to you all

16.

Good luck with the land purchase

17.

Great for the community, potentially new jobs created in the future, more money of our local club that turns into more revenue generated for the town and local businesses.

18.

Great for the future for all ages

19.

Great incentive for our youngsters to participate in sport and grow in confidence

20.

Great opportunity for the growth of the club and development for our kids

21.

Harriers have been a big part of my life for more than 65 years. Even though I now live in Spain, I still get a lot of pleasure from their continued success and further development.

22.

Harriers have been fantastic with my son, i support this 100%

23.

Here is hoping you get the planning permission required and also hope some funding is granted.

24.

I agree that the Harriers should move from Aggborough to Burlish Meadows, as long as the fans get free buses to the home matches.

25.

I do not support this proposal. The children and their children need this important habitat to be protected. To reverse the effects of climate change, we need to increase biodiversity and not sell it for artificial grass pitches. Long after your youth teams have kicked their last football, we need the world to survive.

26.

I fully support Kidderminster Harriers' proposal, which represents a vital investment in community sport and long-term wellbeing across the Wyre Forest. Expanding Burlish Meadows will provide essential space for the club's rapidly growing youth pathway, create high-quality facilities for schools and grassroots teams, and protect sporting provision for future generations while respecting local green spaces.

27.

I fully support the clubs ambition in creating sports facilities within the town. Whatever your age, motivation combined with improved fitness levels important to all.

28.

I think it is a fantastic opportunity for our community and grass-roots football. It will give our local football team a first class training facility too. The land used is a small portion of Burlish, and I'm sure the Harriers will do everything possible to mitigate any impact to wildlife and biodiversity.

29.

I think it is super that an established, safe and respected local community sport club encourages and develops young people, whether talented or not. Kidderminster Harriers is at the centre of the local community, not just in the town but wider area. I fully support developing their youth set-up.

30.

I'm happy to support a great club in anyway I can moving forward

31.

I've been supporting the Harriers since 1967 and in my latter years when I lost my wife to breast cancer just before Covid they became more than just a football club for me. I became a matchday groundsman and also joined the Walking Football sessions, all of which introduced me to lots of different people leading to great company & fellowships. The Harriers plans will open more opportunities for all ages to engage with the Club and enjoy state of the art facilities.

32.

it is an excellent plan to help train and develop the young players for the future of the club and build stronger ties with the local community

33.

It will help kids get fit and give them an objective in their lives. Who knows, one of them may be the next Harry Kane!

34.

It's a very important course especially when we're losing more and more pitches to housing development grassroots football needs this.

35.

It's clear the football clubs influence across the community has grown so much over the last couple of years since Richard took the helm, I personally love the initiatives the club and the Harriers foundation provides for age groups like my little boy and I think this project will only help this further.

36.

Keep it up great for kidderminster harriers

37.

KHFC is a treasure for the Wyre Forest community and we should do what we can to nurture and develop this.

38.

Kidderminster and Stourport has very little space for organised sport for young people, especially since the closures of Stourport Leisure Centre and The Glades. If these plans include provisions to allow schools, local clubs and young people in general to use the facilities and be more active these plans should be supported.

39.

Leisure land for leisure and engaging in both young people and the Wyre Forest community should be seen as greatly beneficial

40.

Let the Harriers fortify the community. Everybody wins!

41.

Let's make the Harriers a strong and longlasting presence for all ages across Kidderminster and the surrounding areas for future generations.

42.

Much needed, all weather pitches are fantastic, keeps kids healthy, engaged and active.

43.

My grandson played there last year and the amount of kids both boys and girls playing football is fantastic the benefits for their personal fitness, wellbeing and development is obvious and I fully support any proposal to maintain and improve the facilities and make it any available to as many people as possible.

44.

My grandson plays for Kidderminster Harriers and is a well rounded child who enjoys his football. I feel that the expansion of the facilities would enhance the experience of the present members and hopefully extend into the community encouraging other young people to develop skills essential for life. Encouraging exercise, healthy lifestyle and developing friendships and team building. This expansion is a good thing for the community.

45.

My understanding is that the land in question was part of Kidderminster Golf Club and has never been part of the Burlish Top Nautre Reserve. It would be great to see this space continue to be used for sport and supporting the local young people. Kidderminster currently have to send their women's teams to Droitwich to play games and under local government changes this will be out of the Area. Building facilities for the local community is expensive and having a local businessman willing to invest in the future should be encouraged and applauded.

46.

Onwards and forward

47.

Protecting wildlife is important, but so is investing in our children. Parents and grandparents should be just as passionate about giving young people safe, high-quality places to play sport and stay active. With plenty of green space still remaining, let's support opportunities that will benefit the next generation rather than stand in their way

48.

Really exciting for the local area and for the club. Being a resident of the Birchen coppice area and a huge harriers fan and season ticket holder, I absolutely support the chairman's ambitions

49.

Reinvesting in young people and grassroots football is absolutely what organised football clubs should be doing. This is a step in the right direction and should be a no-brainer decision. Make the right call please WFDC.

50.

Sports are so much the future of our children,

51.

Such a brilliant idea, letting the kids dream!

52.

Test comments

53.

The Club is a remarkable asset which is well regarded to promote the town of Kidderminster through all of it's sports teams from juniors (boys and girls) up to the first team. They deserve support for their ambition.

54.

The club is essential for youth football development. I have two sons with the club and they couldn't be happier. Unfortunately the facilities are falling behind the numbers playing for the club.

55.

The club provides opportunities for young people across multiple age groups to play sport, learn vital team skills and spend time away from screens in positive environments.

56.

The fact that children will have safe professional areas to play football in is great and will be great for the community. Supporting our local team to grow will benefit all of Kidderminster in years to come.

57.

The more football pitches in the Wyre Forest area the better. We also need to bring our old pitches and parks up to standard. People in the Wyre Forest need more entertainment and good facilities.

58.

The sooner the better!

59.

The town and surrounding towns need these sort of facilities

60.

This is a must requirement.. there is nothing for children and this could be the start of something great

61.

This is a positive thing for the Club & community

62.

This is a really opportunity to help local children build resilience and teamwork. Also provide quality facilities for local schools and other groups to use.

63.

This is exactly the type of investment our area needs. The growth of Kidderminster Harriers' youth section shows just how much demand there is for quality football facilities. More pitches mean more opportunities for children of all abilities to play, develop, stay active and be part of a positive community. As someone involved in grassroots football, I know facilities are one of the biggest barriers to participation. This project will benefit thousands of local people for years to come, and I fully support it.

Greg Forsythe

(Parent to one current u11s player and one ex player)

64.

This is fantastic for our future generations and getting kids and adults into sport

65.

This is for our young people, it is an investment in them.

66.

This is going to be excellent for our community

67.

This is imperative for the club to be sustainable and remain a huge part of the community

68.

This is vital for the successful future of the club.

69.

This would be a fantastic investment for our community. With so many young players now involved, having more quality pitches and facilities will create even more opportunities for children to play, develop and stay active in a safe environment.

It's not just about football – it's about supporting local families, schools, grassroots clubs and community groups for years to come. Wishing Kidderminster Harriers every success with this project. I'll definitely be adding my support.

■♥■,♥■

70.

This would be a great thing in support of the club and what it brings to the community and what club does to keep kids involved in sport

71.

This would be fantastic for the local community. Can the vision take into account other local social and social sporting needs please? Thank you.

72.

This would be great for my son as he's just starting out with the under 7s

73.

This would support more fitness activities for children in the area

74.

To have facilities to host 1000 youngsters will be a bonus for everyone.

75.

Unfortunately the land is now been desecrated with dog poo as the locals think so much of the area they cannot even be bothered to look after it. It is also becoming a site for antisocial behaviour, surely turning into a positive space that will have a positive impact on the local community

76.

Up The Harriers

77.

Upgraded changing rooms/area for the players. A room/bar to hold events like presentations in etc. Nutritional bar with healthy foods and drinks for the players also as I think this is really important. It would also be good to see something created for the siblings of the players.

Thank you.

78.

We all love the beautiful game, from grassroots to the football elite, a platform to learn and progress, to be the best of the best, community and a journey of success, growth, profile and achievement

79.

We need more positive spaces for children and families

80.

We should all get behind our local teams.

81.

We should support the Harriers. We re on the brink of real progress and the Club wouldn't ever hurt our locality

82.

What an excellent plan - needs supporting

83.

While I am used to bigger clubs like Wolverhampton Wanderers having the facilities and money to support young people in the community, I find it gratifying to see a more modest, community, club such as Kidderminster Harriers, putting in the time effort and money to help those who need these kinds of sporting facilities. It should be applauded and supported by everyone.

84.

Whilst another team in our league scrap their women's and girls section completely Harriers are looking to enhance their current offering. If we want more sporting opportunities for children in the District it has to go somewhere, why not on a piece of land that was used for sport, the golf course, up until 2019.

85.

With so many kids sat at home on consoles, i applaud the club's efforts in expanding the kids teams. Childhood obesity is such a problem and any effort to get kids up and active should be supported.

86.

With the protection of the nature reserve but the development of Harriers with the use of all season pitches can only develop children's desire for football, team environments and high quality sporting development around the area.

87.

Wonderful Community Building

88.

Would be amazing for the club and local community!

89.

Would be good for the future footballers and the future of kidderminster harriers.

90.

you reds x

91.

Youth football pathway's are vital for clubs like Kidderminster Harriers, who have to be shrewd in their operations, especially when dealing with a competitive player marketplace which all lower-level clubs have to contend with. By having greater youth facilities, there are greater opportunities to attract better talent which gives the club more strategic options, both for first team development, as well as greater financial pathways through player sales.

The new development showcases a sustainable future for the club, as well as pointing to a culture of bringing your own through, something which strengthens bonds with fans too.

The community aspect of the additional grounds should also not be overlooked as it provides great opportunities for the wider region to benefit from enhanced facilities. This will not only benefit the users (kids) but also will strengthen the bond to the club. Attracting more fans for the club is essential at lower levels, and this provides a great opportunity.

I fully support these plans.

A petition submitted by the Friends of Burlish Meadows in response to Wyre Forest District Council's consultation on the proposed disposal of approximately 8.5 hectares of Burlish Meadows for development as a football training and education hub.

**FRIENDS OF
BURLISH
MEADOWS**

Submitted to: Jamie Sloan,
Wyre Forest District Council
13 August 2026

This report is based on the Change.org petition export of 13 August 2026, 15:32, containing 3,257 verified signatories and 24 recorded comments.

Contents

- 1. Executive Summary
- 2. The Petition Statement

- 5. What Signatories Said: Thematic Overview
- 6. Individual Petition Comments
- 7. Conclusion and Request to the Council
- Appendix A. Petition Signatory Register
- Appendix B. Statistical Summary

1. Executive Summary

This report accompanies the “Save Burlish Meadows – Protect Nature and Community” petition and provides a record of the scale, geographical distribution and stated reasons for public support. It is submitted to assist Wyre Forest District Council in considering the proposed disposal of part of Burlish Country Park.

The Change.org export generated on 13 August 2026 at 15:32 contains 3,257 signatures. Of these, 3,179 are recorded as being from the United Kingdom, with support recorded from 37 countries in total. The strongest named UK concentrations are Kidderminster (458), Stourport-on-Severn (377) and Bewdley (99), alongside wider support across the West Midlands and nationally.

The petition comment record currently contains 24 substantive comments. These are reproduced individually in Section 6. They are evidence of the views and experiences of petition supporters; factual assertions within individual comments are not presented as independently verified findings merely because they appear in the petition record.

SIGNATURES	UK SIGNATURES	COUNTRIES	COMMENTS
3,257	3,179	37	24

2. The Petition Statement

The following is the petition statement presented to supporters on Change.org. It is reproduced so the Council can see the proposition supporters were asked to endorse. Reproduction does not convert every factual assertion in the petition wording into an independently verified finding.

The Issue

Wyre Forest District Council is proposing to dispose of part of Burlish Meadows, within Burlish Country Park, for development as a football training complex.

Since acquiring the site, the Council has invested public money, staff time and volunteer effort to restore the former golf course into a thriving natural greenspace. The restoration has created an increasingly valuable mosaic of habitats, including developing lowland acid grassland—one of Britain’s rarest habitats, with over 95% lost since the 1940s.

Burlish Meadows is now used daily by walkers, families, dog owners, runners, schools, wildlife enthusiasts and people seeking the mental and physical health benefits of access to nature. It also forms an important wildlife corridor linking other valuable habitats in the area.

Once this land is developed, the loss of habitat, landscape and open public space cannot simply be recreated elsewhere. The proposal would also undermine years of public investment in restoring the site and would permanently reduce the extent of Burlish Country Park.

This petition calls on Wyre Forest District Council to:

- Reject the proposed disposal of Burlish Meadows for development.
- Protect the site as an important community and wildlife asset.
- Continue investing in nature recovery and public access at Burlish Meadows for the benefit of current and future generations.

By signing this petition, you are asking the Council to protect one of Wyre Forest’s most important natural spaces and to ensure that Burlish Meadows remains a place where both wildlife and people can thrive.

This is not “nature vs football” there are enough spaces locally to protect both.

The petition also directed supporters to submit individual objections to Jamie Sloan before 14 August 2026 and linked to the Friends of Burlish Meadows group and the Council consultation information.

3. Petition Data and Method

The numerical analysis is based on the Change.org export generated on 13 August 2026 at 15:32. The export contains 3,257 records and the fields Name, City, State, Postal Code, Country and Signed On. The earliest signature in this export is dated 2026-07-05 and the latest 2026-08-13.

Change.org’s signing process requires people signing while logged out to confirm access to the email address supplied; people already logged in have an already-confirmed account. Change.org also applies security checks. Email addresses are not supplied to petition organisers.

For geographic analysis, obvious spelling and formatting variants of the same local place have been consolidated, particularly Stourport-on-Severn, Kidderminster and Bewdley. Full residential postcodes are not reproduced. Where a usable UK postcode was supplied, only the outward/district code is shown in the signatory register.

Names in Appendix A are reproduced from the Change.org export subject only to limited display cleaning: obvious non-name placeholders have been omitted, an email address accidentally entered in a name field has been reduced to the apparent name, and one obvious typographical error has been corrected. No other substantive changes have been made to signatory names.

4. Geographic Distribution of Support

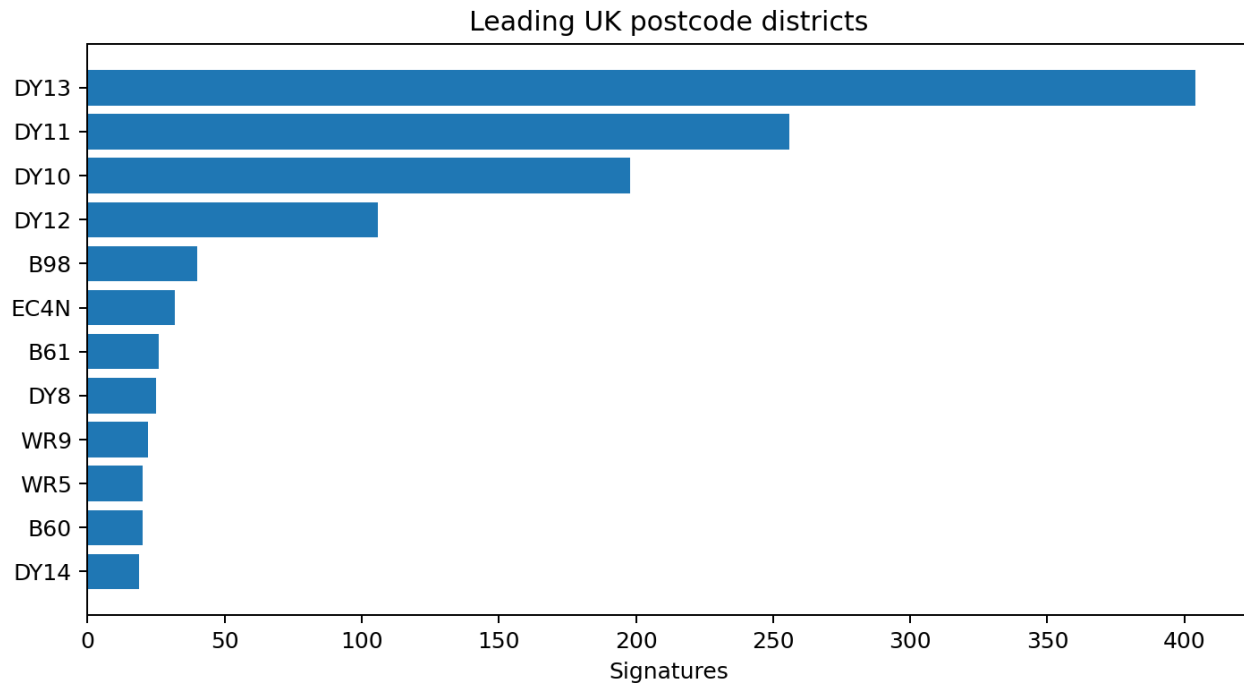

4.1 Local and regional concentration

The strongest cleaned named-location concentrations are Kidderminster (458), Stourport-on-Severn (377) and Bewdley (99). This shows a substantial concentration of support in and around the communities closest to Burlish Meadows.

Location	Signatures
Kidderminster	458
Stourport-on-Severn	377
Birmingham	245
Bewdley	99
Worcester	92
London	77
Bromsgrove	45
Redditch	44
Wolverhampton	38
Stoke-On-Trent	37
Dudley	35
Coventry	33

4.2 Postcode evidence

A usable UK postcode district could be derived for 3,120 UK signatures. The leading districts include DY13 (404), DY11 (256), DY10 (198) and DY12 (106). The postcode analysis supports the conclusion that the petition contains a strong local Wyre Forest and nearby-area component.

4.3 National and international support

3,179 of the 3,257 signatures are recorded as United Kingdom signatures. The petition also contains support from 36 other countries. Protecting nature is a global endeavour. International support does not replace the importance of local views; rather, it reflects the wider concern people have for the protection of biodiversity and publicly accessible green space.

5. What Signatories Said: Thematic Overview

The 24 comments currently recorded were coded against recurring themes. A single comment may contain several themes, so the counts are not mutually exclusive. The purpose is to show the range and recurrence of issues raised rather than to treat the comments as a statistically representative survey.

Theme	Comments currently recorded
Wildlife / habitat / natural environment	13
Public access / amenity / daily use	11
Community value / wellbeing / mental health / tranquillity	10
Children / future generations	5
Alternative site / sports provision / nature and football	6
Concern about future or cumulative development / permanence	7
Dog walking / recreation / exercise / running / cycling	6
Green space loss / protection	4
Green Belt	3
Rare / acid grassland / wildlife corridor	3
Public health / COVID-19 / accessible green space	1
Housing / development pressure	1
Traffic / transport impacts	1
Decision-making / transparency	2
Environmental services (flooding / air quality)	1
Public investment / volunteer effort	1
International supporter with local connection	1
Evidence / user study / baseline data	1

The recurring themes include wildlife and habitat protection, continued public access and amenity, community and wellbeing value, children and future generations, the permanence or cumulative effect of green-space loss, recreation and dog walking, and whether football provision could be accommodated elsewhere. The comments also include concerns about decision-making evidence and transparency.

6. Individual Petition Comments

The comments below are reproduced individually and as closely as possible to the wording recorded in the campaign comment tracker. They are presented as the views of petition supporters. Where a comment contains a factual assertion, prediction or characterisation, it should be read as the signatory's statement unless separately evidenced elsewhere.

Comment 01 — Elaine

"This is a nature reserve, if this is allowed how long before a large carpark, then houses and more, its a greenbelt nature reserve!!!"

Themes recorded: Nature protection; concern about future development / precedent; Green Belt

Comment 02 — Matthew

“Keeping this part of Stourport wildlife and walk way for kids and family is important For this and other generations to come”

Themes recorded: Families; children; future generations; public access; wildlife

Comment 03 — Liz

“Please please please don’t allow the demolition of this beautiful site and habitat. We humans should be protecting our wildlife and enjoying sharing this site with the other creatures that call this home. To quote: "This is an opportunity to create something that will have a lasting impact on the community." I think we already have that - nature.”

Themes recorded: Wildlife; habitat protection; community value; nature as existing legacy

Comment 04 — Vivien

“This land is a nature reserve for Wildlife which families can also access and which enables all children to experience the natural world, learn about it and hopefully care for it into the future. It should be protected from development.”

Themes recorded: Children; education; families; public access; wildlife; future generations

Comment 05 — Emma

“It looks like more than 21% of the land if you consider just Burlish Meadows? The plans look more like 80%. How can something be 'protected' but not be? Kidderminster Harriers could find somewhere more suitable surely”

Themes recorded: Scale of land loss; protected status; alternatives; suitability of site

Comment 06 — Nikki

“I am writing to formally object to the proposed development at Burlish Meadows. Our green spaces are disappearing at an alarming rate, and Burlish Meadows is a valuable natural area that should be protected, not built on. These meadows provide an important habitat for wildlife, support biodiversity, help reduce flooding by absorbing rainwater, improve air quality, and offer a peaceful place for local residents to enjoy nature and improve their physical and mental wellbeing. Once green spaces are built on, they are lost forever. Housing can be built in many locations, but well established meadows and natural habitats cannot simply be replaced. As our towns continue to expand, it is becoming increasingly important to preserve the remaining areas of open countryside for future generations. I urge the council to carefully consider the long-term environmental impact of this proposal rather than focusing solely on short-term development. We need to protect our wildlife, trees, and natural landscapes before there is nothing left. Please reject this application and prioritise the protection of Burlish Meadows for the benefit of local residents, wildlife, and future generations. Thank you for taking the time to consider my objection.”

Themes recorded: Wildlife / habitat; biodiversity; flood mitigation; air quality; mental and physical wellbeing; permanence of loss; future generations; environmental impact

Comment 07 — Daniel

“The core question that emerges from this situation is: why was Burlish Meadows identified as a suitable site for potential sale in the first place? Alarming, it appears that no independent options appraisal was conducted to explore alternative sites or solutions before this specific parcel of restored public land was put forward. This lack of thorough evaluation raises serious questions about the decision-making process and the consideration given to the ecological and public value of the site. According to Wyre Forest District Council’s published Frequently Asked Questions, the proposal arose following an approach from Kidderminster Harriers Football Club regarding adjacent land. The council also states it did not hold a separate business case beyond the published Cabinet report. The process that has unfolded feels distinctly transactional, diverging significantly from an ideal, transparent approach to public land management. An ideal process would involve identifying all potential options, conducting objective evaluations of each, and then selecting the option that best balances competing needs while upholding public trust and environmental commitments. In contrast, the sequence here appears to have been: a request was made, public land was discussed, and then evidence was gathered to support the predetermined outcome. This reversal of logical procedure undermines public confidence.”

Agenda Item No. 7.1 Appendix 5

Themes recorded: Decision-making process; alternatives / options appraisal; transparency; public trust; business case; ecological and public value; concern about predetermination

Comment 08 — Deborah

“I live in Spain, but regularly visit my mother in Stourport. The town is lucky to have a nature reserve to be enjoyed by its residents and visitors. My dogs love their walks there. Its loss would be huge for so many.”

Themes recorded: International supporter with local connection; visitors; dog walking; public access; community value; loss of green space

Comment 09 — Stella

“This is an important green space which is a public amenity used by many. We need to protect our natural environments.”

Themes recorded: Public amenity; green space; community use; protection of natural environment

Comment 10 — Roger

“I live in Highley, and other than the Wyre Forest, Burlish Meadows and Burlish Top are one of the few places where I can walk my dogs without fear of them chasing sheep! More importantly, I feel that Stourport has already been ruined by various 'developments' and traffic congestion. Any further development will only make the traffic congestion worse. The new development adjoining Burlish Meadows is such a distance from the main shops anyone living there has to use a car. The meadows and Burlish Top, and Hartlebury Common, are vital green spaces where people can get away from the ugliness, noise and congestion of Stourport. You really don't know what you've got 'till it's gone. Roger”

Themes recorded: Dog walking; public access; traffic congestion; cumulative development; tranquillity; green space; community wellbeing

Comment 11 — David

“This is simply unnecessary, especially in this area when there's already many many sports pitches that could already be utilised in that way this is Greenbelt land and it should stay that way should not be eroded just for greedy councils to profit”

Themes recorded: Alternative sports provision; need / necessity; Green Belt; opposition to disposal; distrust of council motives

Comment 12 — Oliver

“There are so many reasons that the reserve should be protected. It's become an extremely rare type of habitat, it's filled with rare species, and it's used daily and loved by thousands of people. I run there every week, and the peace and wildlife is one of very few outlets for stress for me. Destroying it for a bunch of football pitches, worse yet to supplement the existing underused ones, is a terrible idea. Not to mention the floodlights and the effect that will have on the rest of the nature reserve. From my perspective the sale looks like a cynical cash grab that will tangibly make my life worse. Please help oppose it as strongly as possible, on behalf of the people that live here, the people that love the nature reserve, and the wildlife that calls it home.”

Themes recorded: Rare habitat / species; daily public use; running; mental wellbeing / stress relief; alternative / underused pitches; floodlighting; wildlife; opposition to sale

Comment 13 — David

“There's so many things that could be said against the proposed development but in the end short term wealth in our broken society wins over long term gains. It seems local planners are determined to pave every bit of local natural land for short term gains.”

Themes recorded: Long-term versus short-term value; opposition to development; natural land protection; distrust of planning decisions

Comment 14 — Dave

“Petition signed. Green spaces are disappearing all too often. Burlish meadows must be saved.”

Themes recorded: Green space loss; protection of Burlish Meadows

Comment 15 — Ann

“If this sale is allowed to proceed and the land is granted a change of use from Green Belt to sports use, what safeguards will prevent further development in the future? Today it may be proposed for sports use, but tomorrow could we be faced with large stadiums accommodating thousands of football supporters, together with extensive hardstanding, car parks, access roads, lighting and other associated infrastructure? Once this valuable green space is lost to development, it will be extremely difficult, if not impossible, to restore it. Burlish Meadows is precious green space and should be protected for the benefit of local residents, wildlife and future generations. We should not be sacrificing our green spaces without fully considering the long-term consequences. Please stop the gradual erosion of our green spaces. Protect Burlish Meadows and keep it green for future generations.”

Themes recorded: Green Belt; future development / precedent; safeguards; infrastructure / lighting / car parks; permanence of loss; residents; wildlife; future generations

Comment 16 — Carol

“Destroying Meadows isn't necessary if there are other places for football.”

Themes recorded: Alternative sites; nature vs football; necessity

Comment 17 — anne

“We need to protect our nature reserves not just for our well being but for our wildlife too.”

Themes recorded: Nature protection; wellbeing; wildlife

Comment 18 — Elizabeth

“Burlish Meadows is not only an important public space used daily by many people but also an important space for wildlife, creating a wildlife corridor for the surrounding areas with important acid grassland recovery which supports many different species of wildlife. I personally use this space for exercise, enjoyment of the wildlife and open space and also to maintain my mental health.”

Themes recorded: Public space / daily use; wildlife corridor; acid grassland recovery; species; exercise; mental health; open space

Comment 19 — Charles

“Burlish Meadows has been restored from an abandoned golf course into genuinely valuable habitat - including acid grassland, one of Britain's rarest and most depleted - through years of public money and volunteer effort. Disposing of part of it writes that investment off permanently, and the habitat and open access can't be recreated elsewhere. This isn't nature versus football; there are other sites locally that don't require losing one to get the other.”

Themes recorded: Restoration from golf course; acid grassland; public investment; volunteer effort; permanence of loss; public access; alternative sites; nature and football

Comment 20 — Kerrie

“Burlish Country Park and the meadows are not simply fields; they are an essential part of our community, providing opportunities for recreation, exercise, wildlife conservation and, for many people including myself, vital support for our mental wellbeing. Once green space such as this is developed, it is almost impossible to replace. The COVID-19 pandemic demonstrated just how valuable accessible local green spaces are. During lockdowns, people were encouraged to use nature for exercise and to support their mental health while maintaining social distancing. Those green spaces became lifelines for countless people. Since then, Stourport has continued to expand, with more and more housing eating away at our precious green spaces despite the fact that local green spaces are essential infrastructure for public health. For me, this issue is deeply personal. Like many people, I rely on these natural spaces not only for walking my dog but for maintaining my mental health. Spending time in nature has a profound impact on my wellbeing and helps me cope with the pressures of everyday life. I know I am far from alone. Dog walkers, families, older residents, runners, cyclists, wildlife enthusiasts and countless others all benefit from having these spaces on their doorstep. Losing them

Agenda Item No. 7.1 Appendix 5

would have lasting consequences for our community. Once green space is lost, it is rarely recovered. Future generations deserve the same opportunity to experience nature and this”

Themes recorded: Community value; recreation; exercise; wildlife conservation; mental wellbeing; COVID-19 / lockdown experience; public health; housing pressure; dog walking; families; older residents; runners; cyclists; future generations; permanence of green-space loss

Comment 21 — Brodie

“Please don’t remove this beautiful place, too many places like this are already getting removed”

Themes recorded: Green space loss; protection of Burlish Meadows; cumulative loss of natural places

Comment 22 — Richard Edwards

“I now live in a large city, but grew up in the area and one of the things I miss is the easy access to green and open spaces.

Destroying this one for a facility that could be located on a less sensitive site seems unconscionable against the backdrop of the climate, biodiversity and mental health crises, in one of the most nature-depleted countries on Earth.”

Themes recorded: Former local resident; access to green/open space; alternative less sensitive site; climate; biodiversity; mental health; nature depletion

Comment 23 — Tim Gibbs

“Natural areas need more protection.”

Themes recorded: Nature protection; green space protection

Comment 24 — Steph McMenemy

“There needs to be a study on use. Especially of the lower car park and surrounding area”

Themes recorded: Evidence / user study; public use; lower car park / surrounding area; decision-making evidence

7. Conclusion and Request to the Council

The petition demonstrates substantial public concern about the proposed disposal of part of Burlish Country Park. At the 13 August 2026 15:32 data snapshot it contained 3,257 signatures, including 3,179 from the United Kingdom. The geographic data show a particularly strong concentration in Kidderminster, Stourport-on-Severn, Bewdley and the surrounding postcode districts, alongside wider national and international support.

The individual comments show that supporters are motivated by a range of concerns and personal experiences, including wildlife and habitat, public access, recreation, physical and mental wellbeing, children and future generations, cumulative loss of green space, alternative locations for football provision and confidence in the evidence used to make the disposal decision.

Friends of Burlish Meadows respectfully requests that Wyre Forest District Council:

- records this report and the accompanying petition register as a formal representation in the disposal consultation;
- takes the scale and geographic concentration of petition support into account alongside individual consultation objections;
- considers the substantive themes and personal-use evidence expressed by supporters rather than treating the petition only as a headline signature total; and
- includes this petition evidence, together with any addendum submitted before consultation closure, in the material reported to Members before the final disposal decision.

Agenda Item No. 7.1 Appendix 5

A short addendum is intended to be supplied on 14 August 2026 if further verified signatures or substantive comments are received after the data snapshot used for this report.

Appendix A. Petition Signatory Register

The Change.org export generated on 13 August 2026 at 15:32 contains 3,257 signature records. The register below reproduces the signatory names, subject only to limited display clean-up: obvious non-name placeholders have been omitted, an email address accidentally entered in a name field has been reduced to the apparent name, and one obvious typographical error has been corrected. For UK signatories, only the first part (outward code) of the postcode is shown. Full postcodes are deliberately not reproduced.

A dash indicates that no usable UK outward postcode was available in the export, including signatories recorded outside the United Kingdom.

FRIENDS OF BURLISH MEADOWS

PETITION EVIDENCE REPORT

ADDENDUM 1 - 14 AUGUST 2026

Formal consultation representation: proposed disposal of part of Burlish Country Park

13 Aug snapshot	14 Aug 15:27 snapshot	Increase	UK signatures
3,257	3,431	+174	3,349

Purpose of this addendum

This addendum supplements the Friends of Burlish Meadows Petition Evidence Report submitted to Wyre Forest District Council on 13 August 2026. The main report used the Change.org export generated at 15:32 on 13 August, when the petition contained 3,257 signatures.

A fresh Change.org export generated at 15:27 on 14 August contains 3,431 signatures - an increase of 174. The updated export records 3,349 UK signatures, an increase of 170 since the main-report snapshot.

Updated petition position

The additional signatures received since the main report reinforce the level of public concern already evidenced in that submission. This addendum does not replace the main Petition Evidence Report; it should be read with it and treated as part of the same formal consultation representation.

Further update before consultation closure

The published consultation information gives 14 August 2026 as the closing date but does not state a specific closing time. The petition remains open and continues to receive support. If further signatures or substantive comments are received later today, Friends of Burlish Meadows intends to submit a final short addendum recording the latest position before the end of 14 August.

Request to the Council

Friends of Burlish Meadows asks Wyre Forest District Council to record this Addendum 1 as part of the formal representation already submitted and to ensure that the updated petition total is included with the consultation material placed before Members prior to any final decision on disposal.

Data source: Change.org petition signature export generated 14 August 2026 at 15:27.

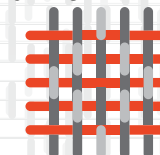

Submitted to: Jamie Sloan, Wyre Forest District Council.

Appendix A. Additional Signatories Since the Main Report

The 14 August 2026 15:27 Change.org export contains 182 records that were not present in the 13 August 2026 15:32 export used for the main petition report. Eight records that appeared in the earlier export no longer appear in the current export, so the overall petition total has increased by a net 174 signatures, from 3,257 to 3,431.

The names below are the additional records appearing in the current export. For UK signatories, only the first part (outward code) of the postcode is shown. Full postcodes are not reproduced. A dash indicates that no usable UK outward postcode was available or that the signatory is recorded outside the UK.

Kidderminster Harriers Football Club & Wyre Forest Community Campus for Sporting Excellence

THE VISION (updated)

Kidderminster Harriers FC

Summer 2026

KHFS-ONE-ZZ-XX-RP-Z-0001

Creative environments

Location

The Kidderminster Harriers' training ground, located South of the town centre, represents a key asset for player development and community engagement. Its strategic position offers significant potential to strengthen links with local residents and support long-term talent pathways.

Enhancing connectivity between the training ground and surrounding neighbourhoods can deliver wider benefits, fostering community cohesion and encouraging active lifestyles. This approach aligns with broader objectives for sustainable growth and inclusive development within Kidderminster.

Kidderminster Harriers' stadium situated North of the training grounds, serves as a focal point for matchday activity and civic pride. Together, these facilities provide a strong foundation for integrated planning that supports both sporting excellence and community well-being.

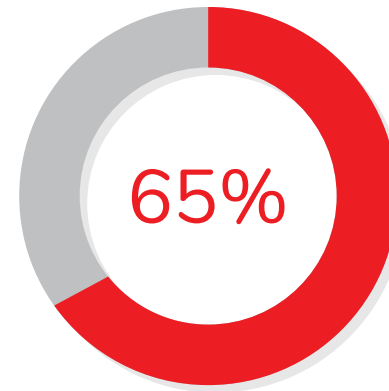

The Case for Change

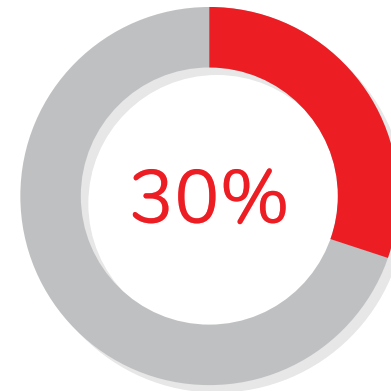

Addressing Health and Accessibility in Kidderminster:

Kidderminster faces a critical challenge in promoting healthier lifestyles and improving access to sports facilities. With approximately 65% of adults and 30% of children classified as overweight or obese, the community is grappling with rising health concerns linked to inactivity. At the same time, approximately 15% of residents live with disabilities, many of whom face barriers to engaging in sports and recreation. Furthermore, the current lack of high-quality football pitches and training facilities limits opportunities for residents to enjoy the physical, social, and mental health benefits of sports. These issues underline the need for investment in inclusive, modern sports infrastructure to serve all members of the community.

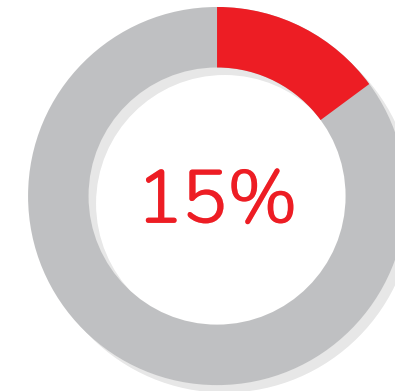

**Data comes from various sources including NHS England and the National Child Measurement Programme, Health Survey for England, Sport England's Active Lives survey.*

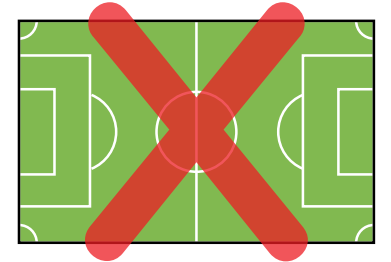

Approximately 65% of adults are classed as being overweight or obese in England

Approximately 30% of children are classed as being overweight or obese in England

Approximately 15% of people in England have a disability that restricts them from participating in physical activity

Limited access to high-quality football pitches

Aims of the Project:

Promote Healthier Lifestyles:

Reduce obesity and inactivity rates by providing accessible and engaging sports opportunities.

Enhance Inclusivity: Ensure that new facilities accommodate individuals with disabilities, fostering equal opportunities for participation.

Expand Football Access: Develop high-quality football pitches and training grounds to support grassroots programs and community leagues.

Strengthen Community Engagement: Create spaces where residents of all ages can come together to enjoy the benefits of physical activity.

Support Talent Development: Provide local youth with the resources they need to thrive in football and other sports.

Promote Healthier Lifestyles

Enhance Inclusivity

Expand Football Access

Strengthen Community Engagement

Support Talent Development

Concept & Vision

Kidderminster's heritage as the home of carpet weaving dates back to 1735, with the creation of the iconic reversible flat weave known as the Kidderminster carpet. This durable and intricately patterned design symbolises the town's craftsmanship and innovation, providing the perfect inspiration for our vision, connecting its legacy to its future.

The redevelopment of Kidderminster Harriers stadium embodies the vision **"From Fibres to Football: Weaving Harriers into the Community,"** celebrating the town's proud heritage as the heart of carpet manufacturing and one of the Harriers' nicknames, **"The Carpetmen"**. Just as carpets weaves together threads to create something enduring and meaningful, this project unites Kidderminster's historic identity with the Harriers' football legacy. It will ensure the stadium becomes a vibrant hub that strengthens connections, honors tradition, and inspires future generations.

THE TRAINING GROUND

Kidderminster Harriers FC

The Existing Training Ground

The Kidderminster Harriers Training Ground serves as an important facility for the club, supporting player development and team preparation. Conveniently located within reach of the main stadium, it plays a key role in the club's operations and connection to the local area.

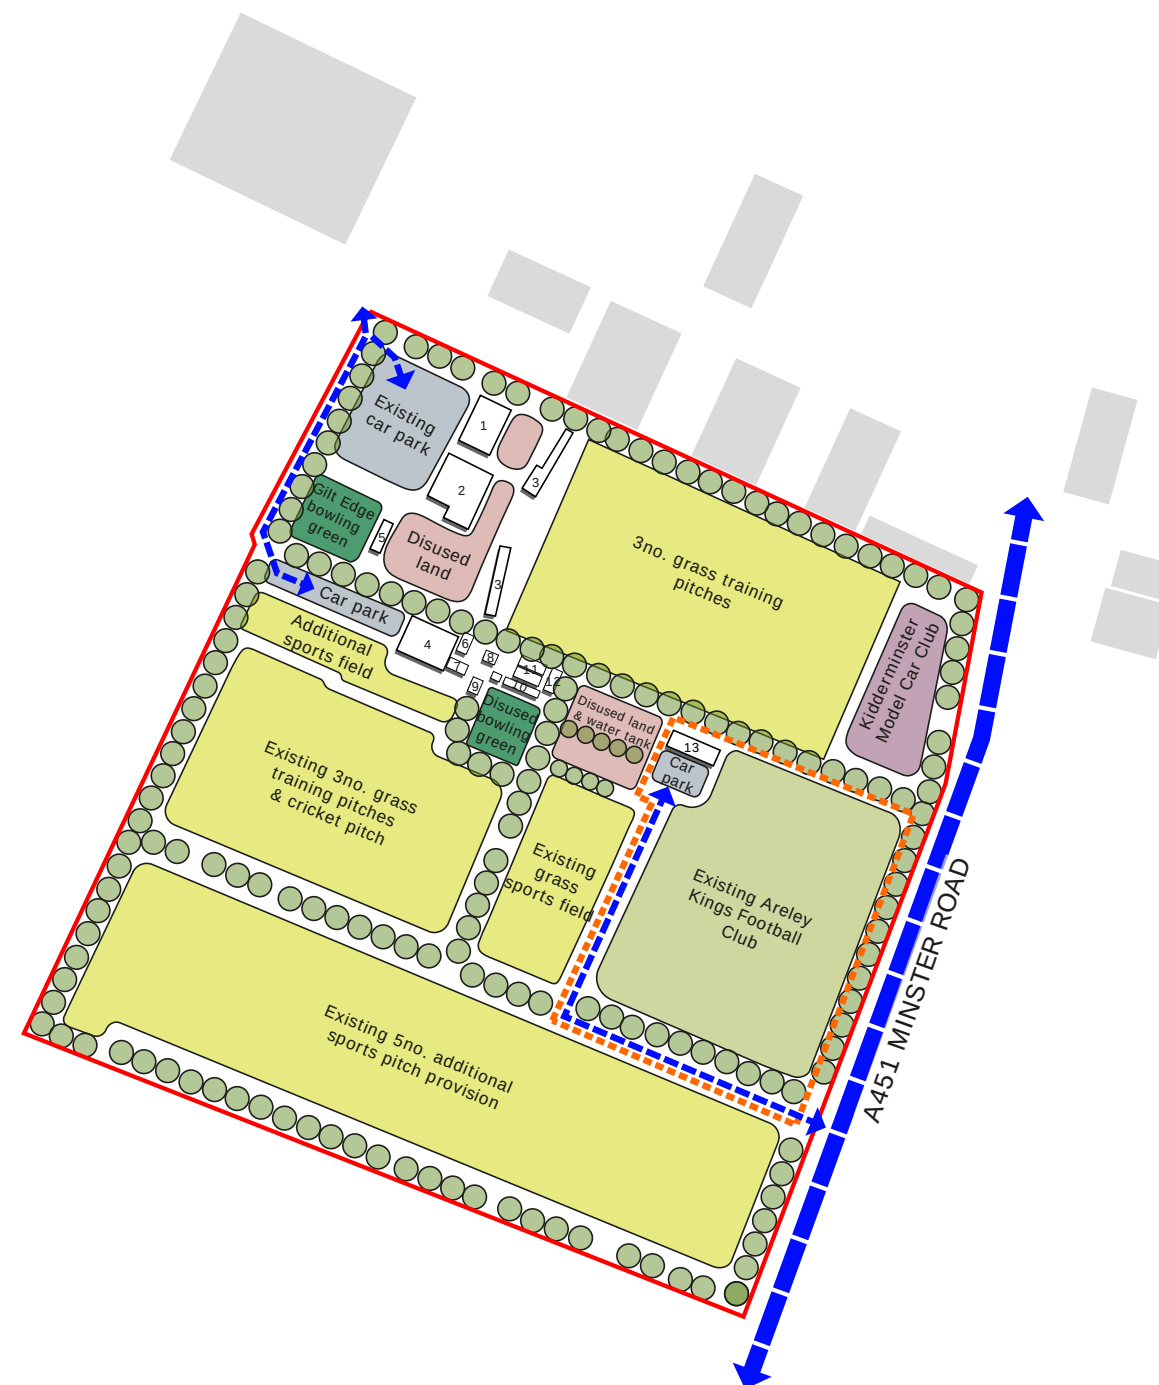

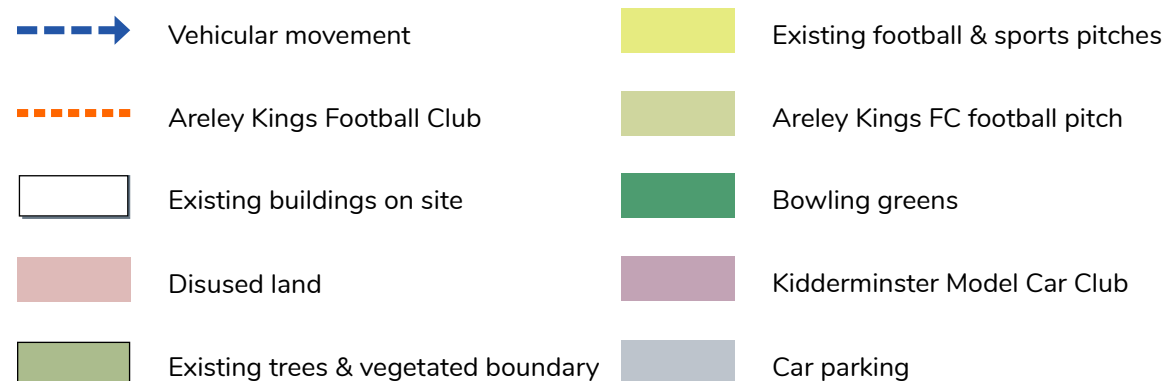

However, there are several limitations with the current setup that restrict its effectiveness:

Inadequate Parking: The parking provision is limited, causing difficulties during peak usage times.

Restricted Facilities: The training ground lacks the modern features needed to fully support the demands of a growing football club.

Space Constraints: The current layout restricts opportunities for expansion or additional training resources.

These challenges underline the need for investment and improvement to ensure the training ground can meet future needs.

Existing Site Photograph Locations

The map adjacent highlights the locations where the existing site photographs were taken, providing context for the current state of the stadium and its surroundings. These images on the following pages offer a visual reference to the stadium's layout, facilities, and overall condition.

Red Line Plan for additional pitches

Preferred Expansion Option

The Proposal, envisions a redevelopment of the Kidderminster Harriers Training Ground, combining the existing land with surrounding land to significantly enhance the club's facilities. This proposal increases both grass pitch and all weather pitch provision, creating a balanced and flexible environment to support training, education, and community engagement. The proposed campus style design establishes a hub for sporting excellence, with the potential to include on site accommodation and state-of-the-art education facilities. This approach aims to position the site as a centre for talent development and a school for sporting excellence, benefiting both the club and the wider community.

The vision diagram highlights several key features of the redevelopment:

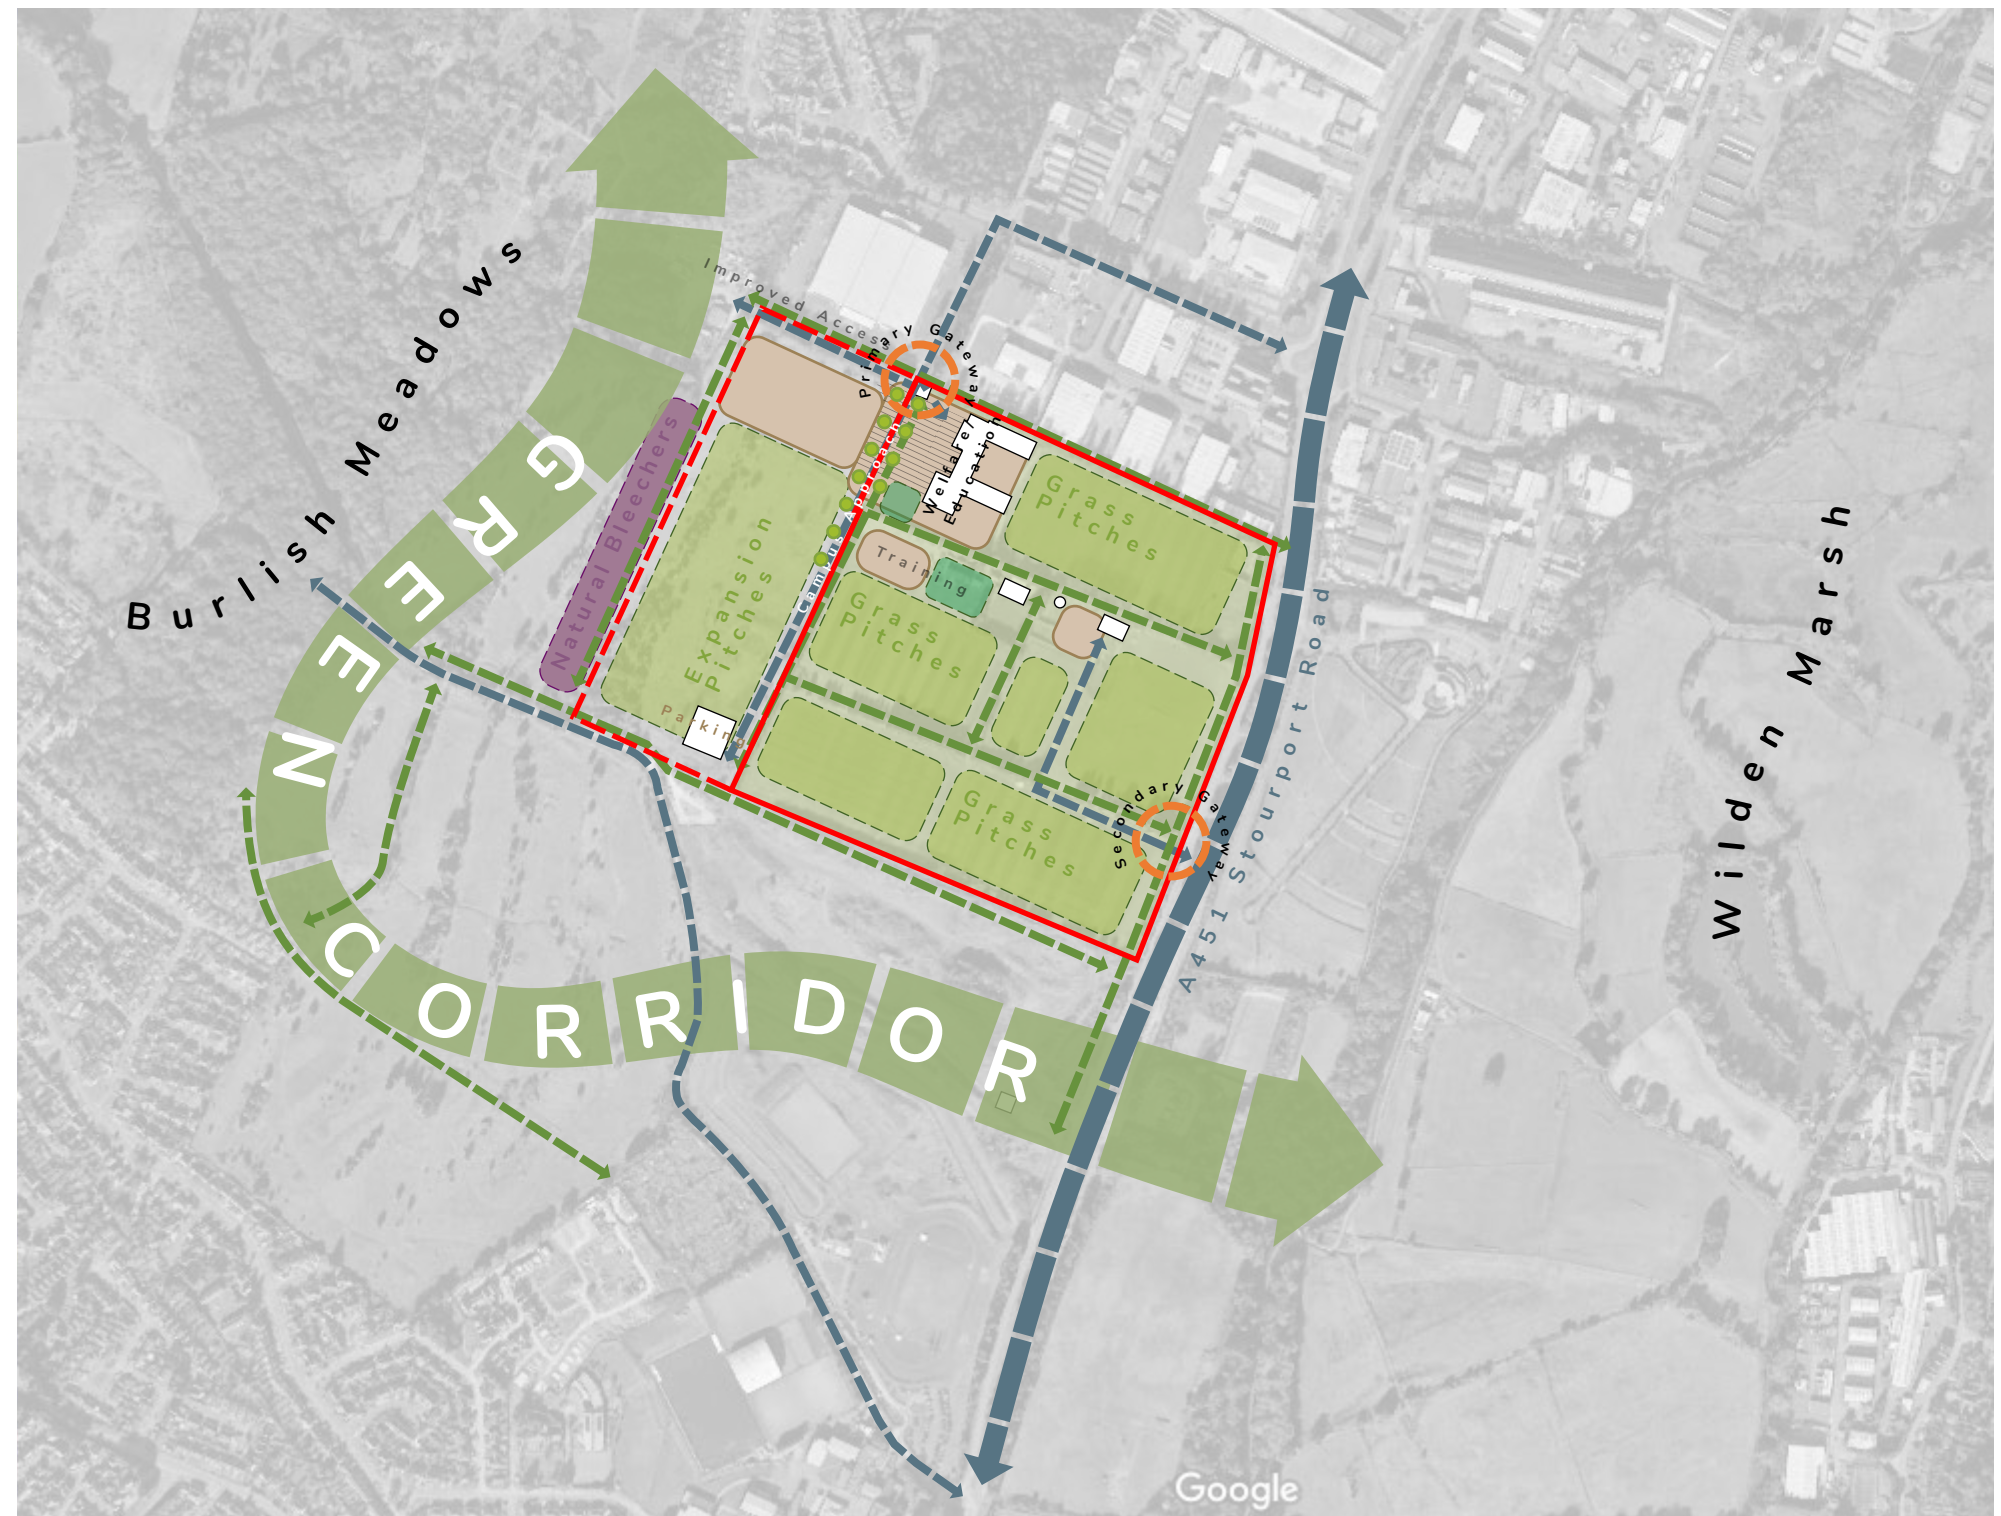

Wildlife Integration: Strengthened wildlife corridors and natural barriers enhance biodiversity while seamlessly integrating site security.

Topographical Design: Incorporating natural bleachers and pitch-viewing areas aligns with the existing landscape, creating a functional and visually cohesive environment.

Improved Gateways and Access: Redesigned access points strengthen connections to the surrounding area, improving flow and security.

Connection to Burlish Meadows: Thoughtful transitions into the adjacent Burlish Meadows ensure the development respects and complements the local green belt.

Preservation of Green Space: Sufficient open green space is maintained within the design, limiting urban sprawl and preserving the rural character of the area.

The Proposed Plan

The redevelopment of the Kidderminster Harriers training ground aims to create a state-of-the-art campus for sporting excellence. This transformation will reinforce the brand identity across both the stadium and training ground, using cohesive design elements and materials that reflect the heritage of the Harriers and the local community.

Key aspects of the training ground redevelopment include:

A Campus for Sporting Excellence

The upgraded training ground will become a high performance hub, fostering development for players of all levels. With cutting edge facilities, it will support the first team, academy, and community programmes alike, reinforcing the club's reputation as a centre for footballing excellence.

Unified Design and Identity

To strengthen the link between the stadium and training ground, the redevelopment will feature consistent materials, branding, and design themes. This will create a seamless identity across both sites, celebrating the club's connection to Kidderminster's rich industrial and cultural heritage while promoting sustainability and progress.

Expanded Facilities for Community and Club Use

The training ground will include enhanced pitches, gym and rehabilitation spaces, and classroom facilities. These resources will not only support the professional and youth teams but also be available for use by local grassroots clubs, and community initiatives, embedding the Harriers further into the community.

A Centre for Innovation and Education

Building on/ replacing existing facilities. The aim is to incorporate modern classrooms and meeting spaces, where the campus will promote education, coaching, and sports science. This dual focus on athletic and academic development will empower future generations, while also offering spaces for workshops and events that benefit the wider community.

Sustainable and Future-Focused Design

The development will prioritise sustainability, incorporating eco-friendly materials and energy-efficient technologies to ensure a minimal environmental impact.

Existing and Proposed Pitch Facilities

SPORTS FIELDS AND PITCHES

The table shows that the proposals will allow an increase of 13 pitches to 20 pitches of various sizes. *Includes existing pitches and 3G which are within the acceptable FA tolerances for a full size. E.g. AGP 106m x 70m and Community 3G pitch 97m x 61m.

There is still a shortfall, if pitches were to be dedicated to one age group (size). However this is normal, and full size pitches, through colour markings/ linings can be used for multiple age groups and delivered through robust management processes. The proposed pitches also takes account of the loss or existing grass pitches for 3G and assumes their relocation within the identified expansion area. Most importantly the full size pitches of 13 plus 2 will meet 11 v 11 demand before sub-division.

This increase will allow KHFC to manage intensity of use more effectively. i.e. how many teams there are, how frequently they train and play, what age groups they comprise, what facilities they need, and how the site operates across a typical week and weekend.

Existing and Proposed Pitches

Pitch Format	Size (m)	Existing pitches*	Proposed pitches	Ideal number of pitches required for teams (assuming no sharing with other age groups)			
				Current 60 Teams	Ideal for current demand	75 Teams	Proposed 100 Teams+
5 v 5	37 x 25	0	1	1	2	3	8
7 v 7	55 x 37	1	2	4	5	9	10
9 v 9	73 x 46	1	2	3	7	9	11
11 v 11	105 x 70	11	13	6	10	14	14
3G 11 v 11	105 x 70/ 106 x 70m	0	2				
		13	20*	14	24	35	43

SPORTS FIELDS AND PITCHES

The masterplan delivers a comprehensive suite of high-quality playing surfaces designed to alleviate the district's documented overplay and accommodate future growth. By thoughtfully zoning the site, the development seamlessly integrates both natural grass pitches and all-weather 3G Artificial Grass Pitches (AGPs) into the existing topography.

This layout not only maximises usable match-play hours year-round but also maintains necessary ecological buffers, ensuring the sporting infrastructure sits harmoniously alongside the Burlish Top Nature Reserve and adjacent meadows.

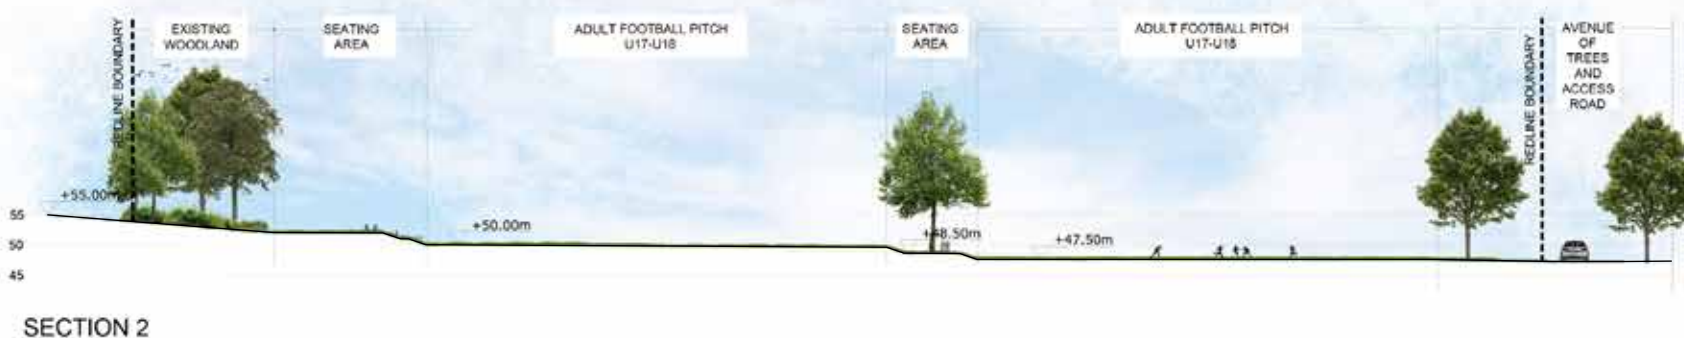

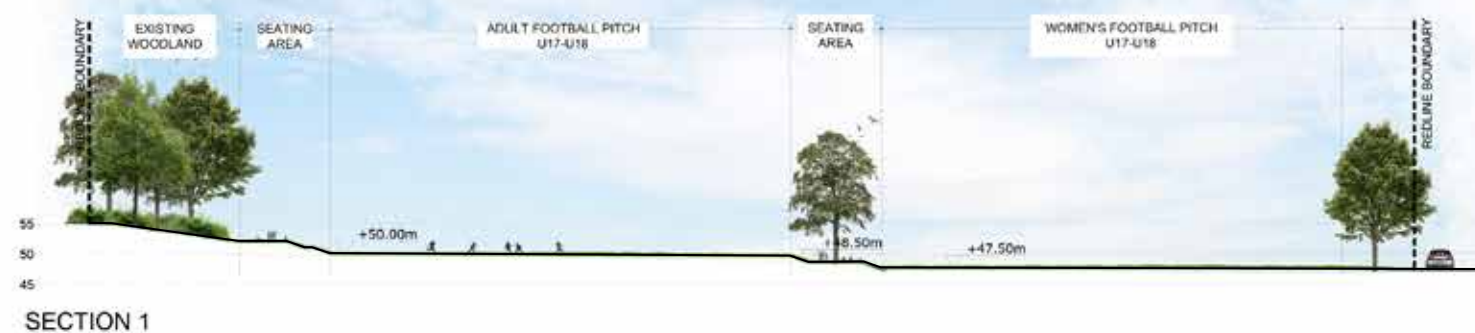

Sections

LEVELS

The pitches have been laid out to work with the existing levels so that natural terraces can be formed, which may also form grass viewing terraces for spectators.

The orientation also follows the old golf fairway and the pitches have been reduced in size to the west so that as many trees as possible can be retained.
